It all started when *Reed Richards*, his wife *Sue*, her brother *Johnny* and pilot *Ben Grimm* flew into space.

Suddenly, the ship was pierced by mysterious *cosmic rays*!

The rays caused them to *crash* back to Earth--and made them feel very *strange*!

"I'll take a look around to see if we can get help--what's happening!?" said Reed.

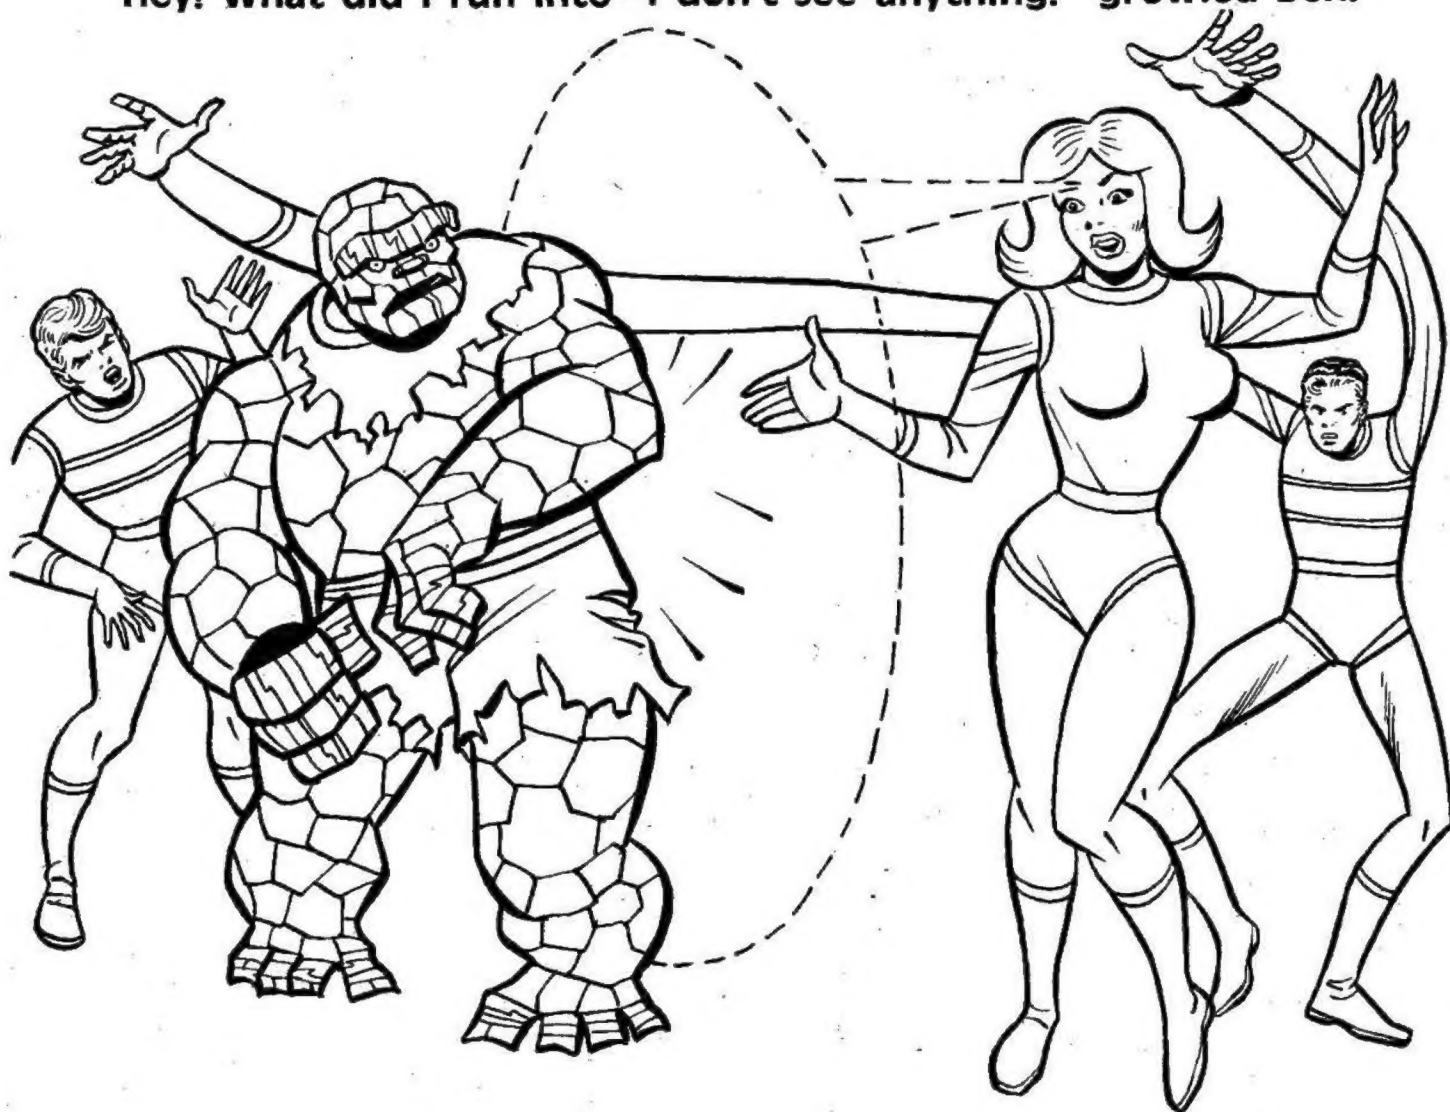

"You're stretching!" exclaimed Sue. "Maybe we should call you Mr. Fantastic!"

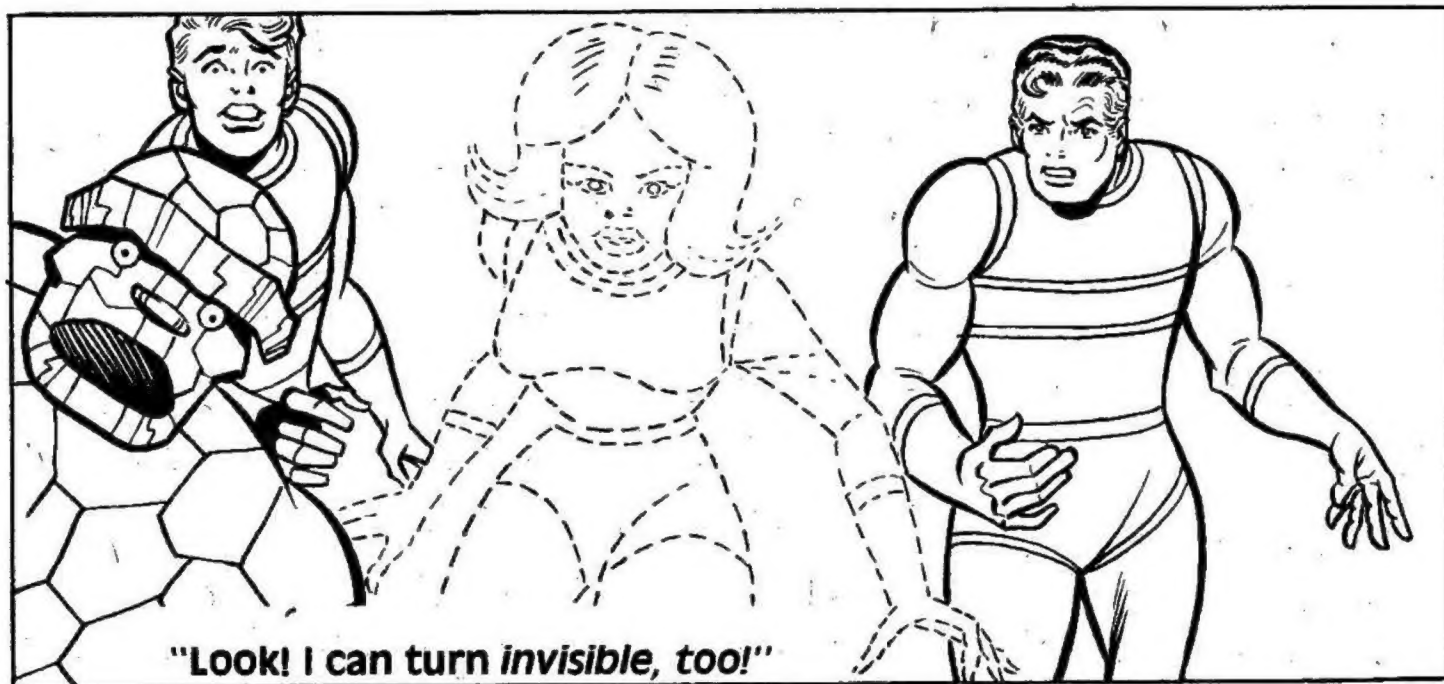

Ben Grimm began changing, too--into *The Thing*!

"Hey! What did I run into-- I don't see anything!" growled Ben.

"You scared me, "said Sue," so I created a *Force Field!*"

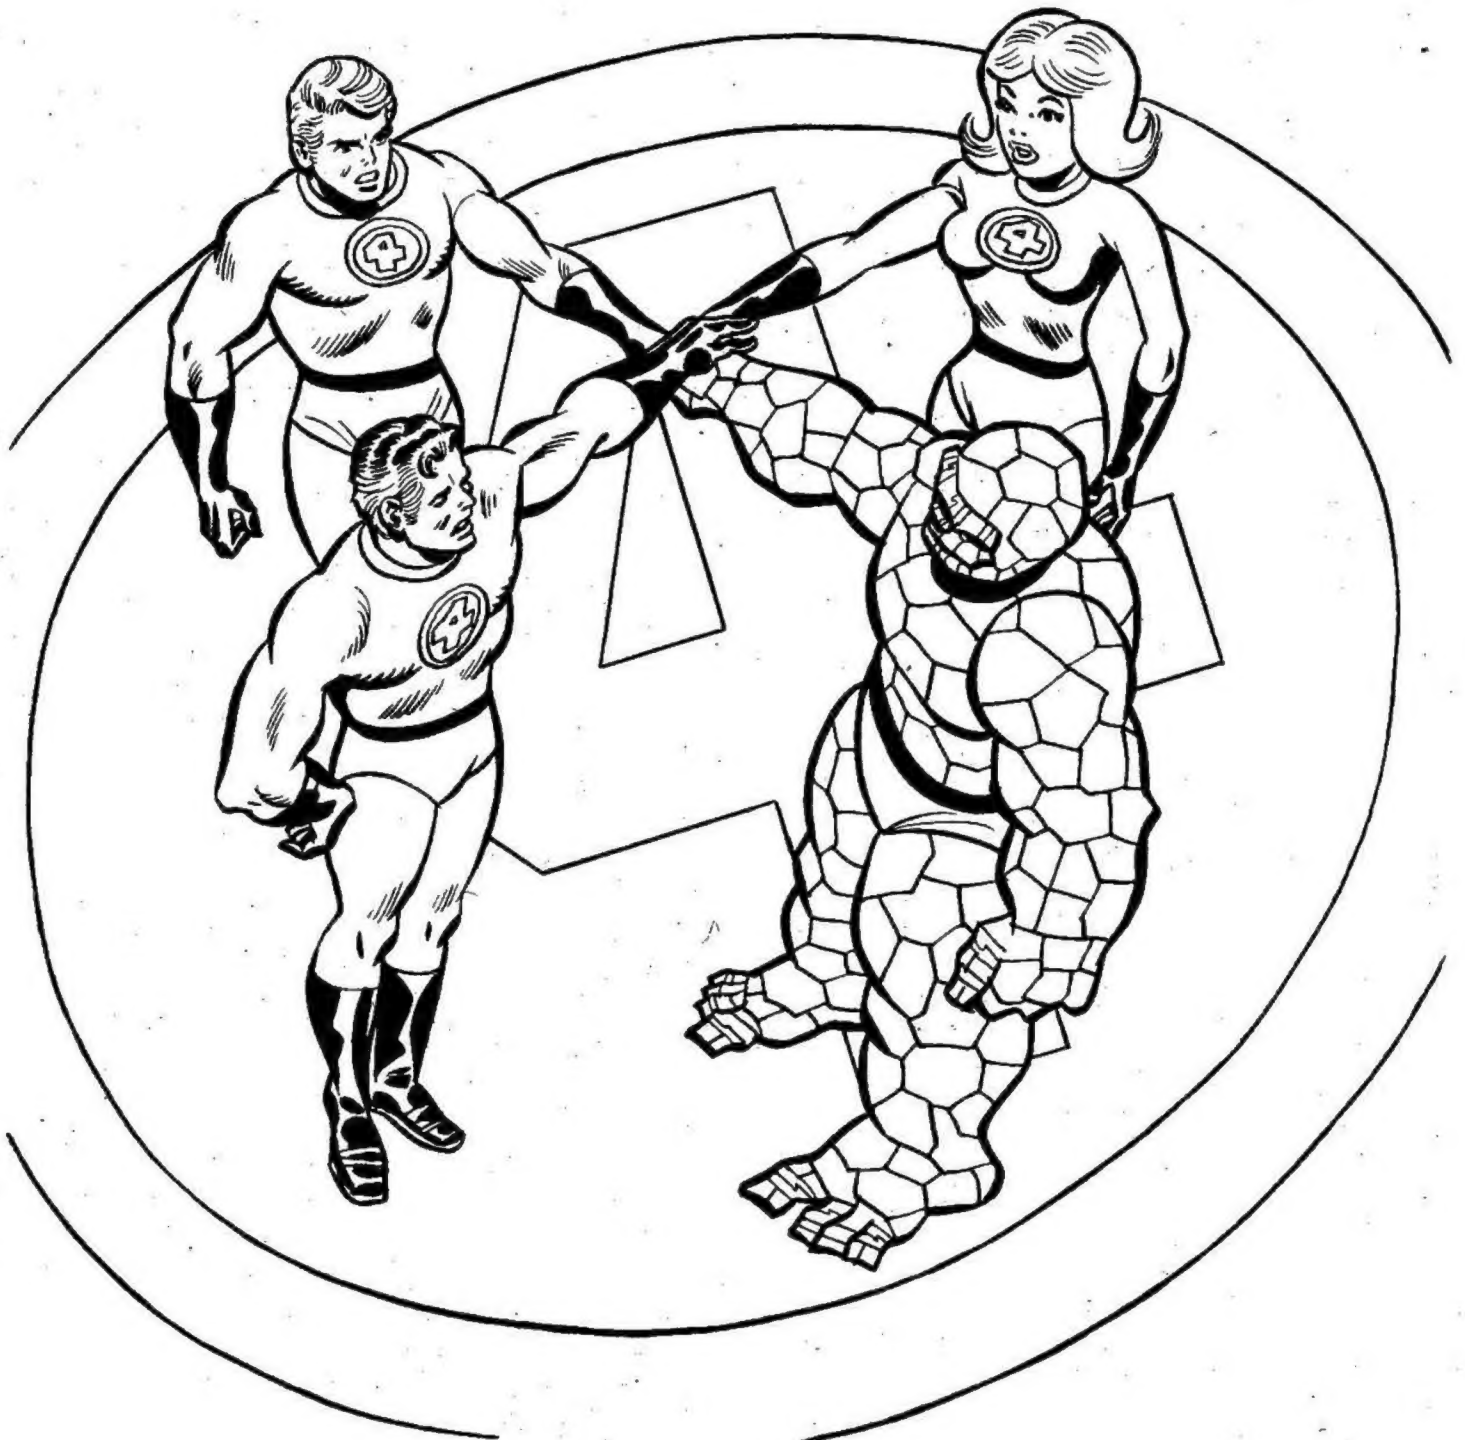

"Look! I can turn *invisible*, too!"

Suddenly, Johnny flamed
into the sky...

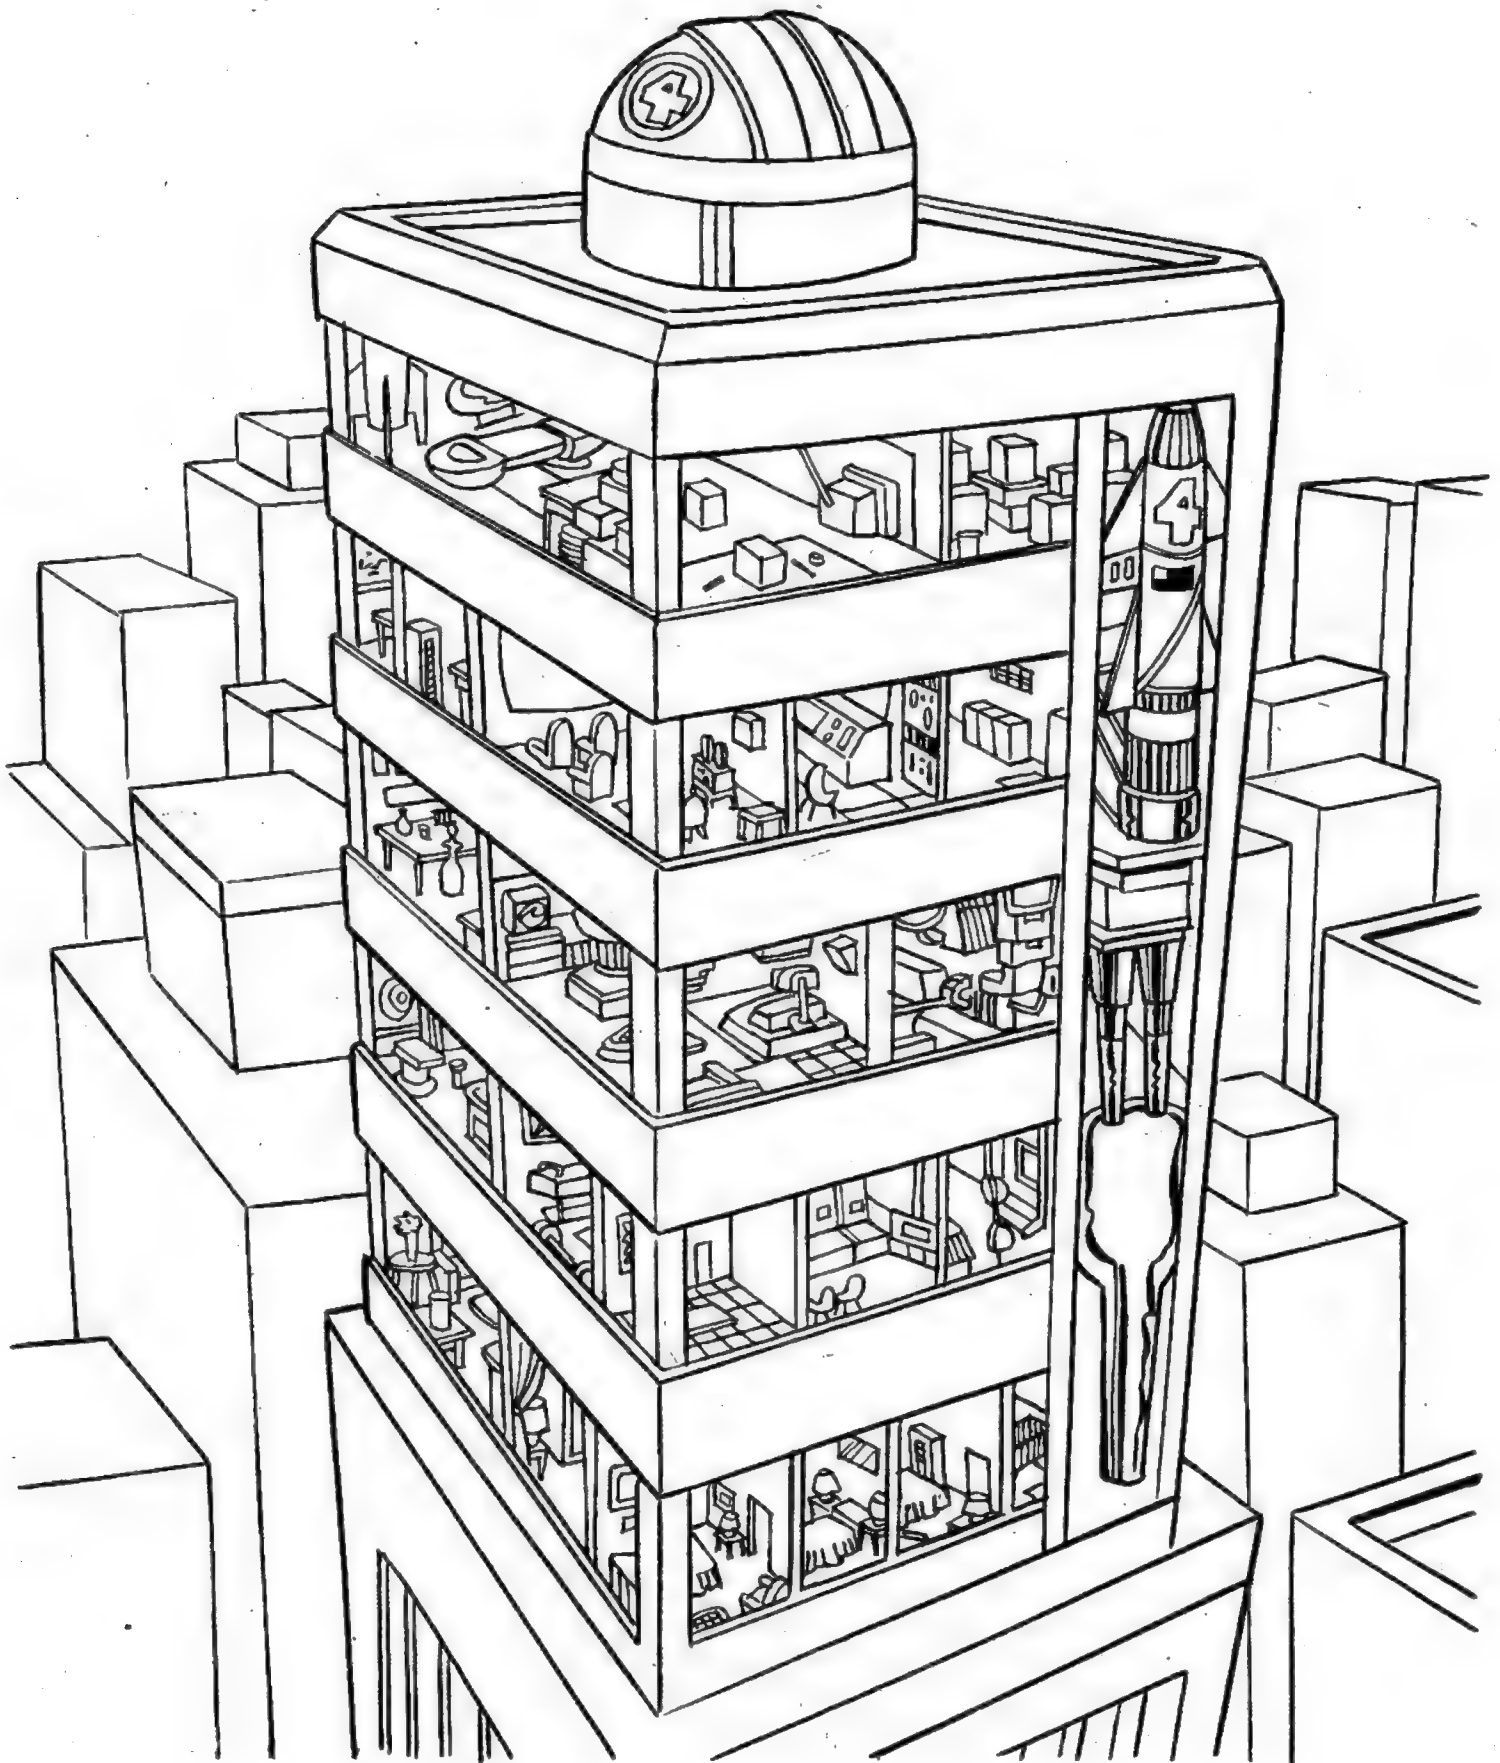

"I'm a *Human Torch*,"
he said, "and I can fly!"

Together, they are -- *The Fantastic Four!* As a team, they decided to use their *powers* to fight crime!

Reed Richards built them a headquarters called the *Baxter Building*!

Since then, The Fantastic Four have *defeated* many powerful foes: *The Wizard*, who is as brilliant as Reed Richards, but hopelessly evil--

-Paste-Pot Pete, a master of traps and menaces, whose powerful glue can even hold the Thing-

--and the *Sinister Sandman*. His mysterious ability to turn his body into sand made him nearly unstoppable!
Yet, *all three* were defeated by the Fantastic Four!

But all three have escaped from prison and taken a vow to band together, joined by *Medusa*, whose living locks of hair make her a powerful ally!

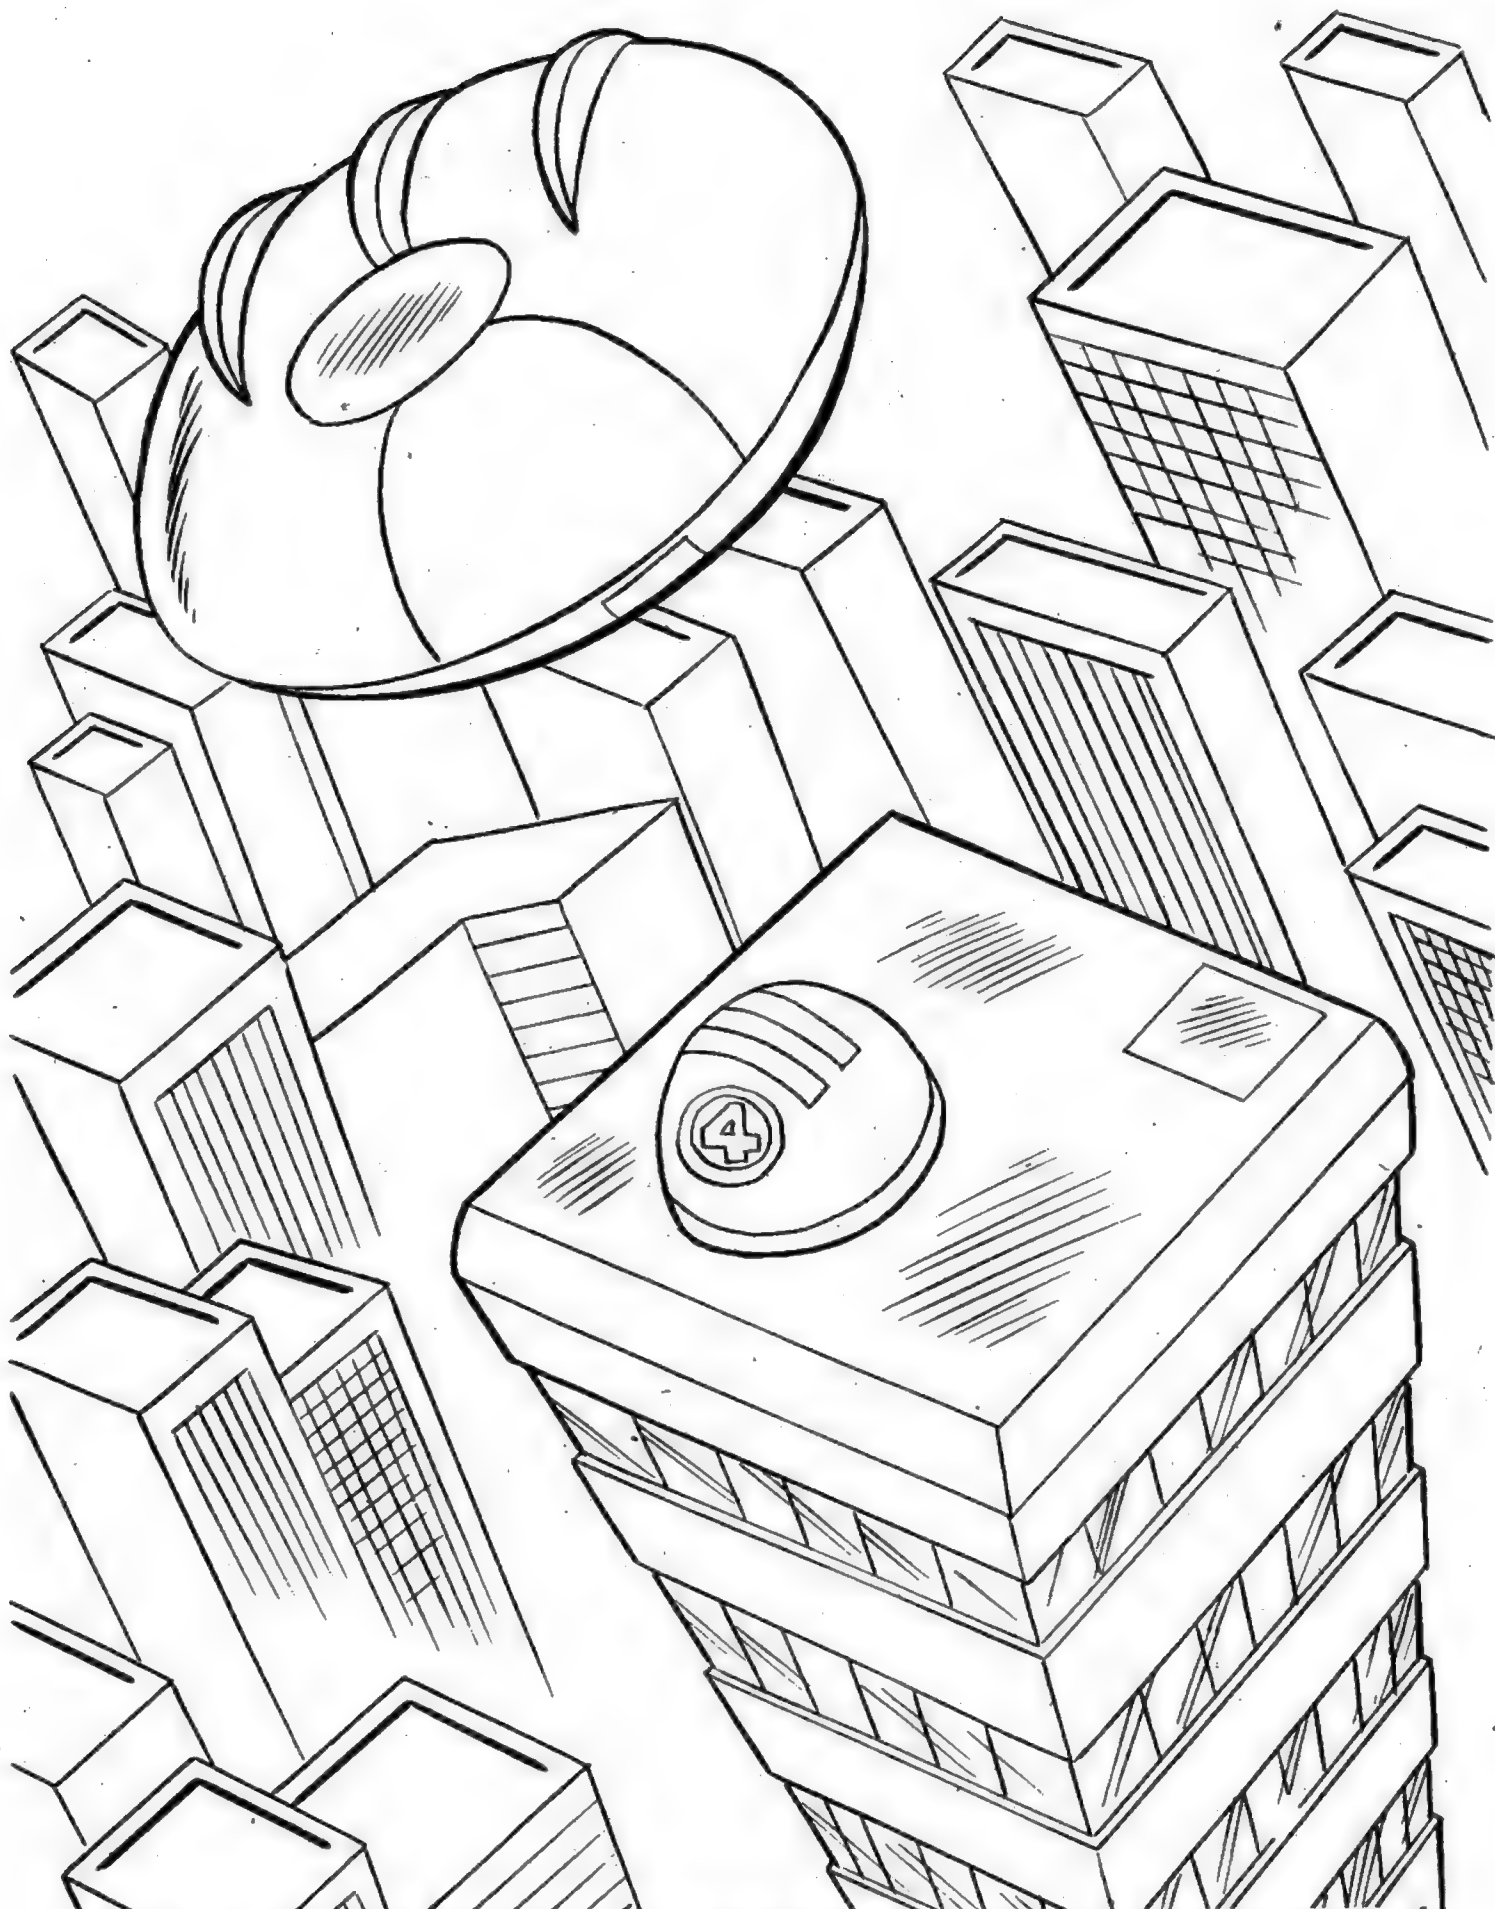

Paste-Pot Pete has even changed his name to *The Trapster*!

**Together, they call themselves *The Frightful Four*! Their goal?
To destroy the Fantastic Four!**

It's breakfast time at the Baxter building!

Outside, the *Frightful Four* are landing their ship on the rooftop! 11

The Thing decides to read a magazine and doesn't see the danger!

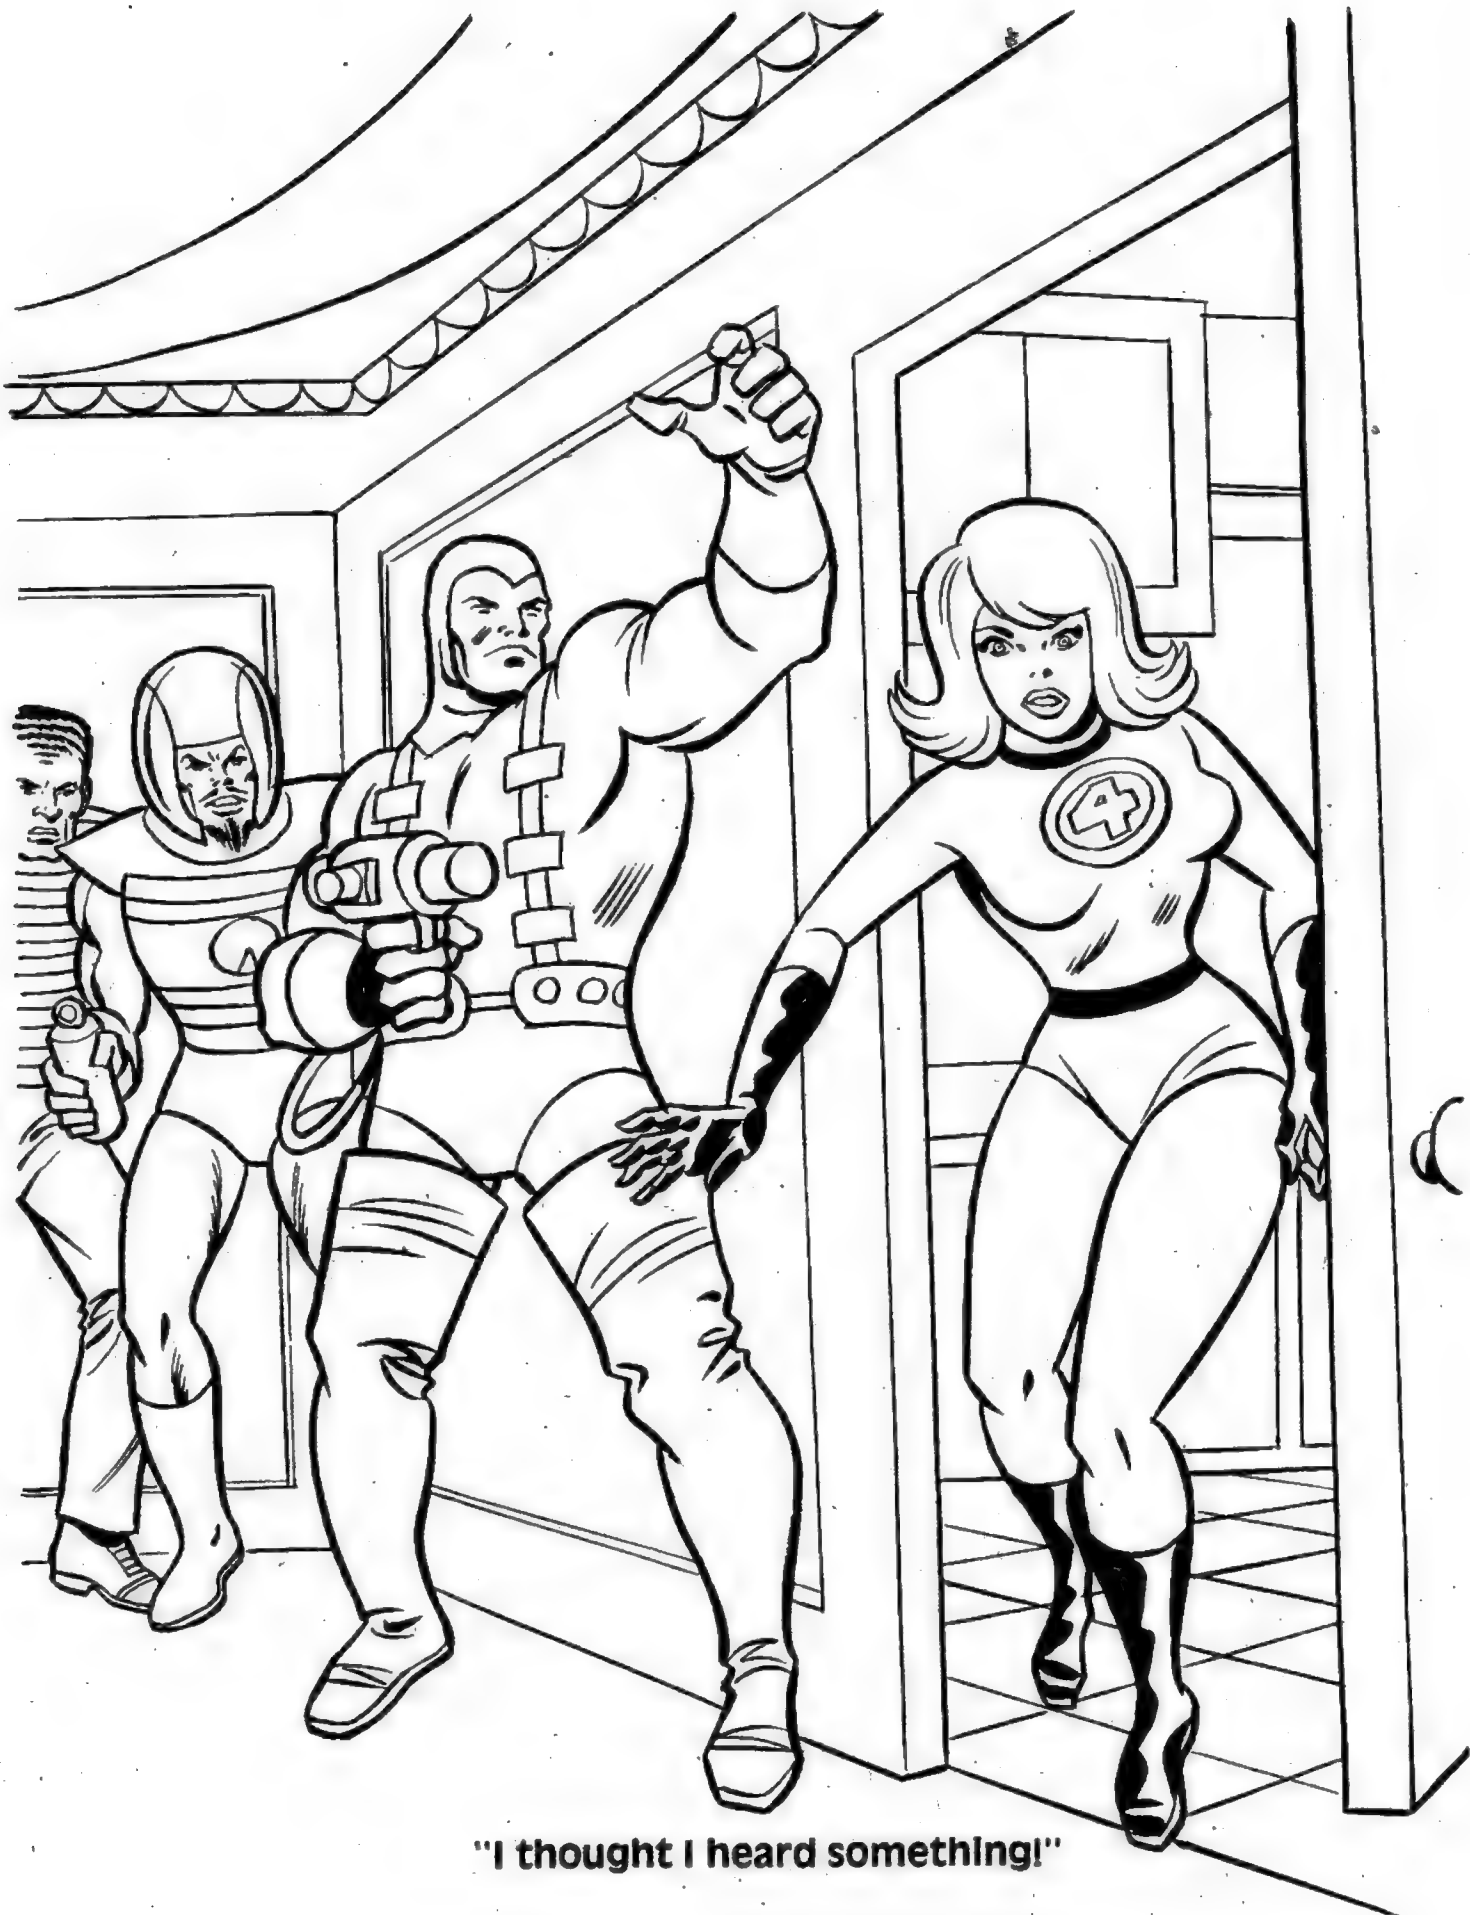

The Trapster fires his glue gun...

...and the mighty *Thing* is helpless!

Ben is knocked out with gas by the Wizard!

"I thought I heard something!"

Sue senses danger and uses her invisible *Force Field*!

Sue calls for help, and *Mr. Fantastic* springs into action!

The Sandman strikes!

So Reed whips up a sand storm!

But even Mr. Fantastic can't be everywhere at once!

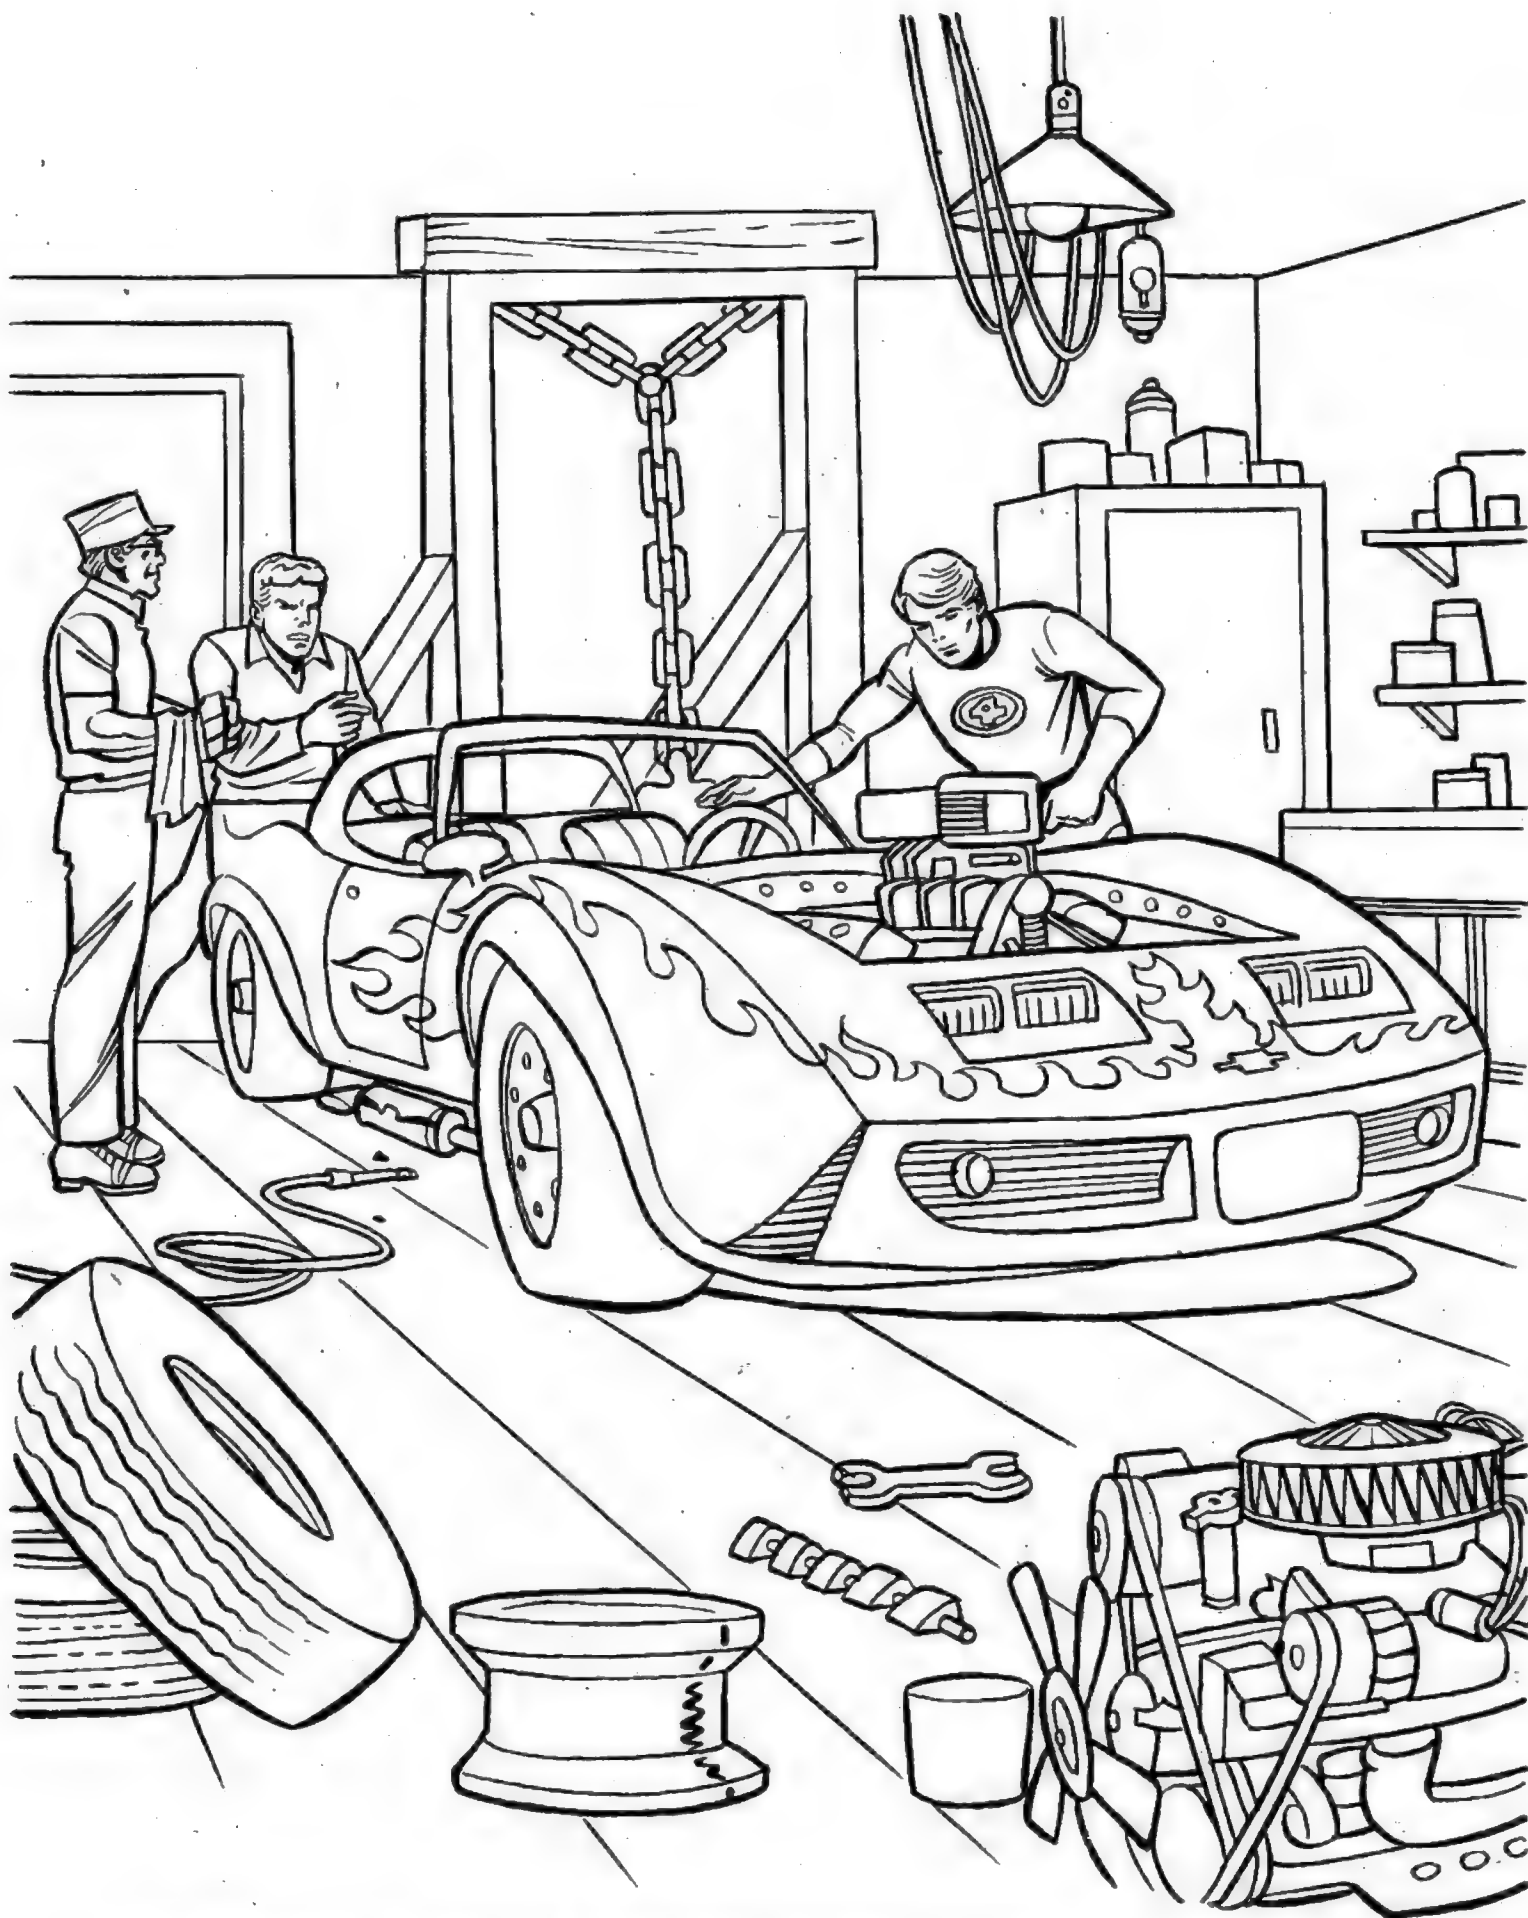

With lightning speed, Sue acts...projecting Invisible *Force balls* at the bad guys!

But Medusa has been hiding!

It looks like the F.F. are beaten--but Reed still has a trick left!

Meanwhile, Johnny is with his hot-rod buddies...

Suddenly, the *Fantastic Four Flare* appears in the sky!

"That's my signal to **FLAME ON!**"

Meanwhile, at the Baxter Building...

The Wizard's anti-gravity discs make the F.F. float away!

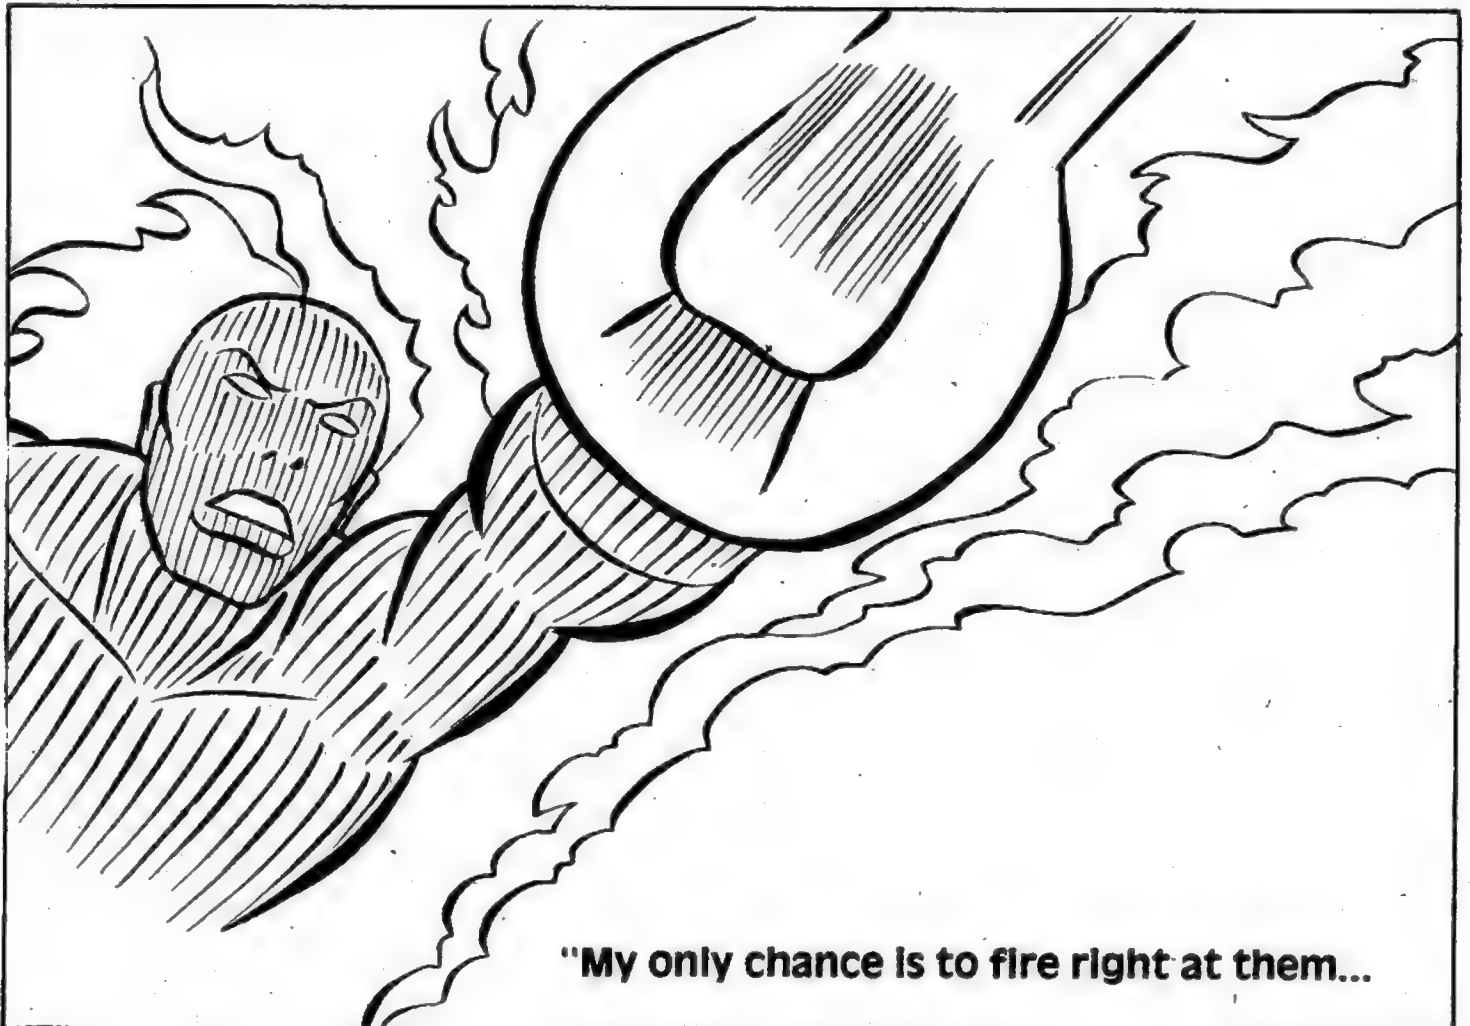

"By the time they wake up, they'll be in orbit-forever!"

But the Human Torch sees his partners...

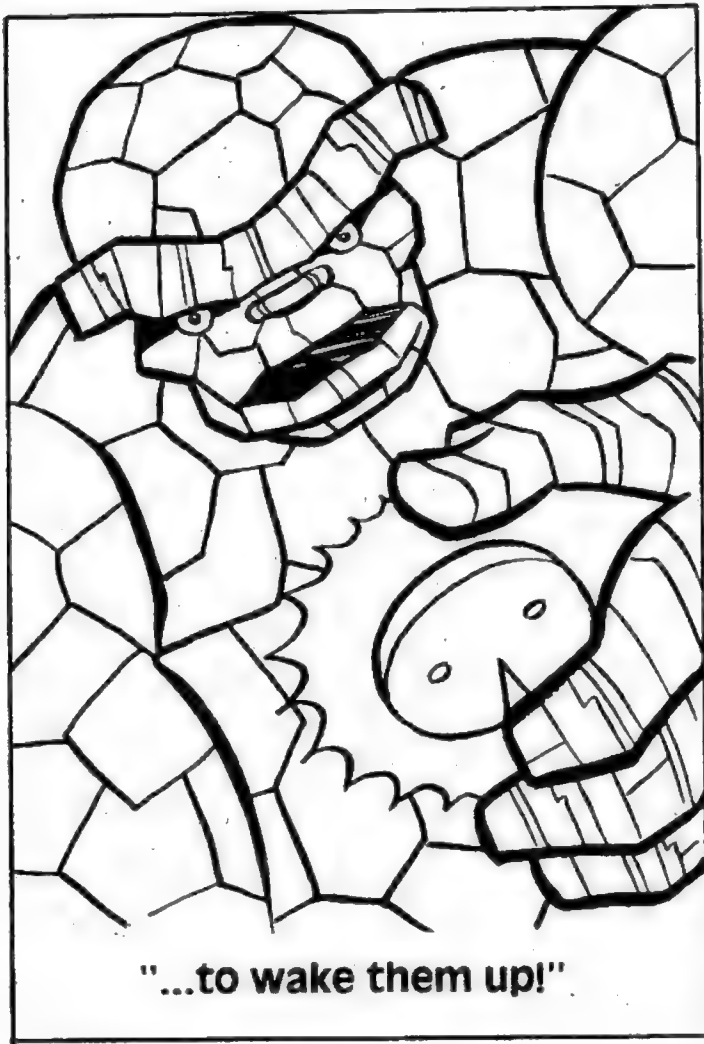

"They're going too fast! Too high!"

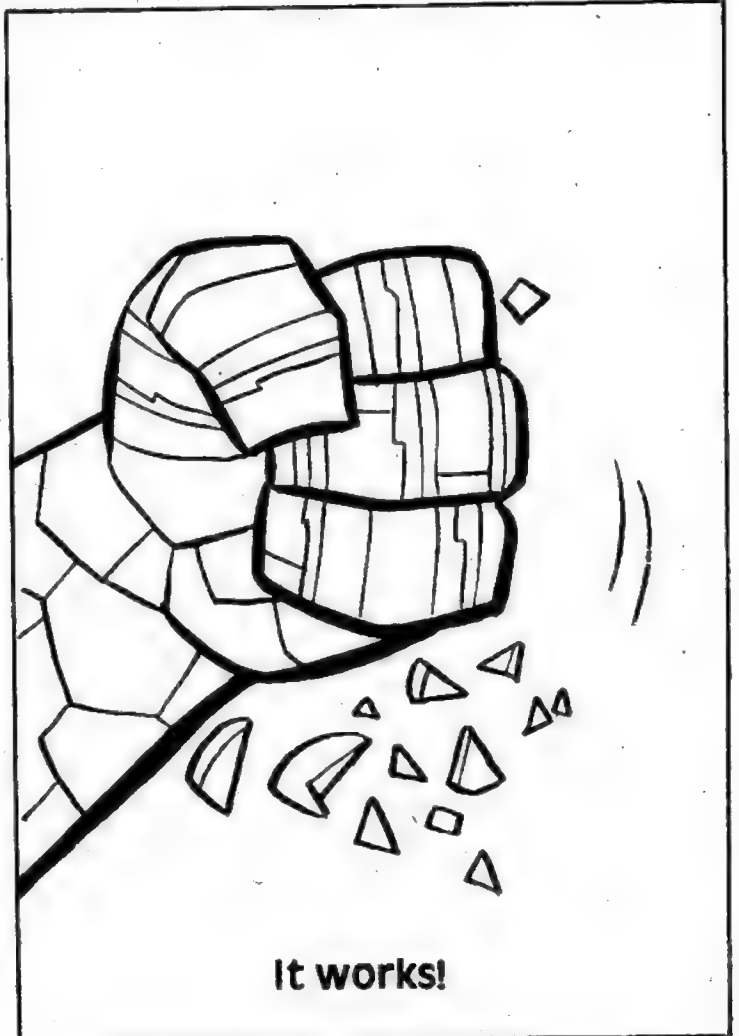

"My only chance is to fire right at them..."

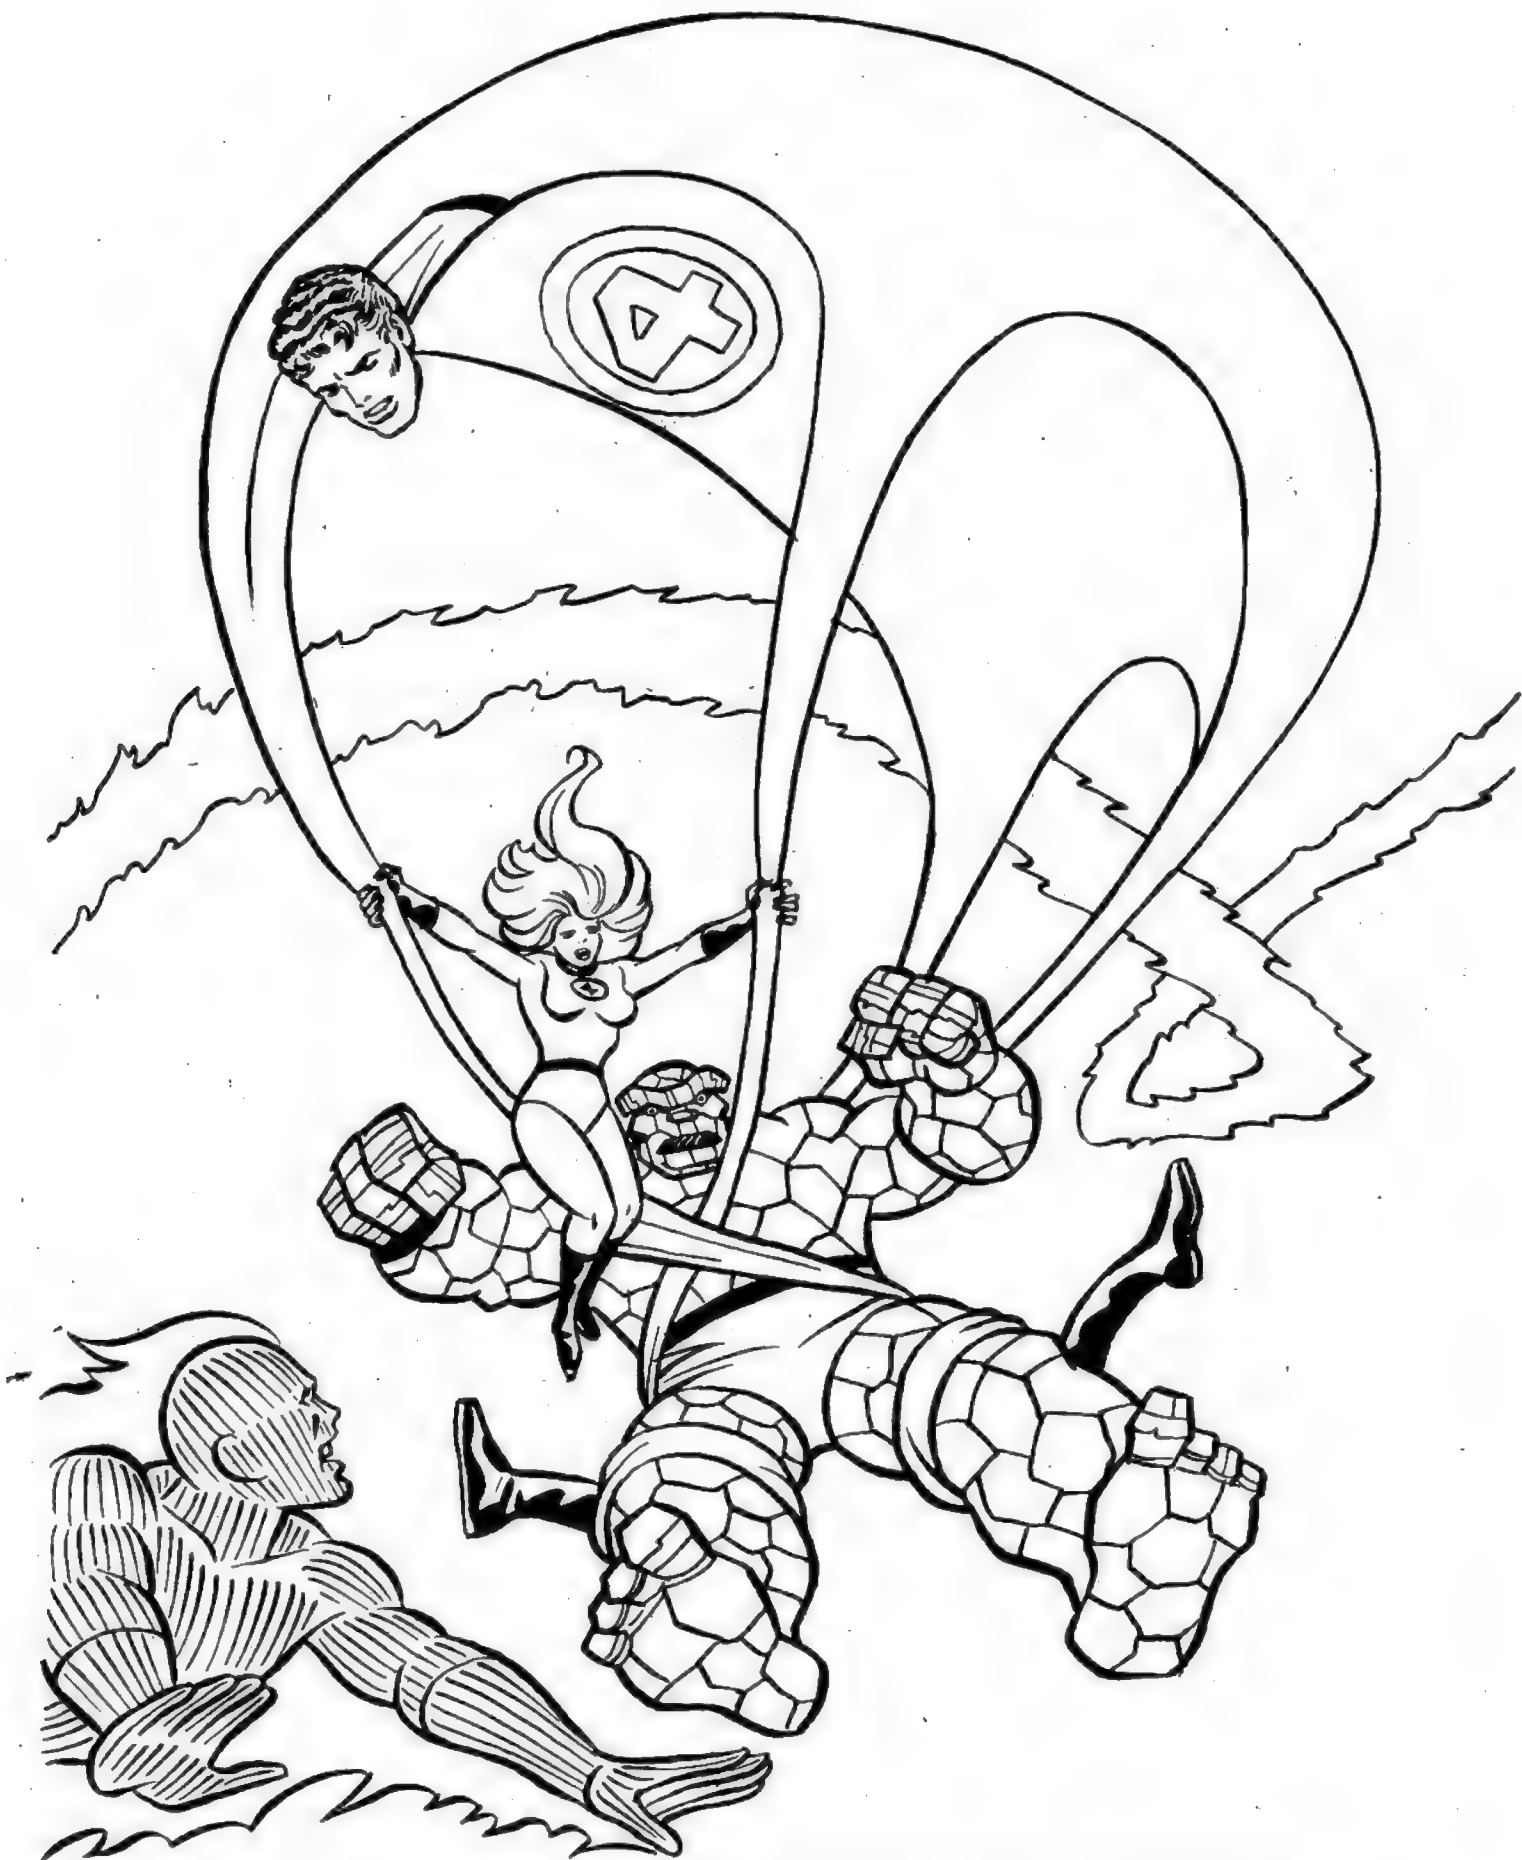

"...making bright, exploding fireworks..."

"...to wake them up!"

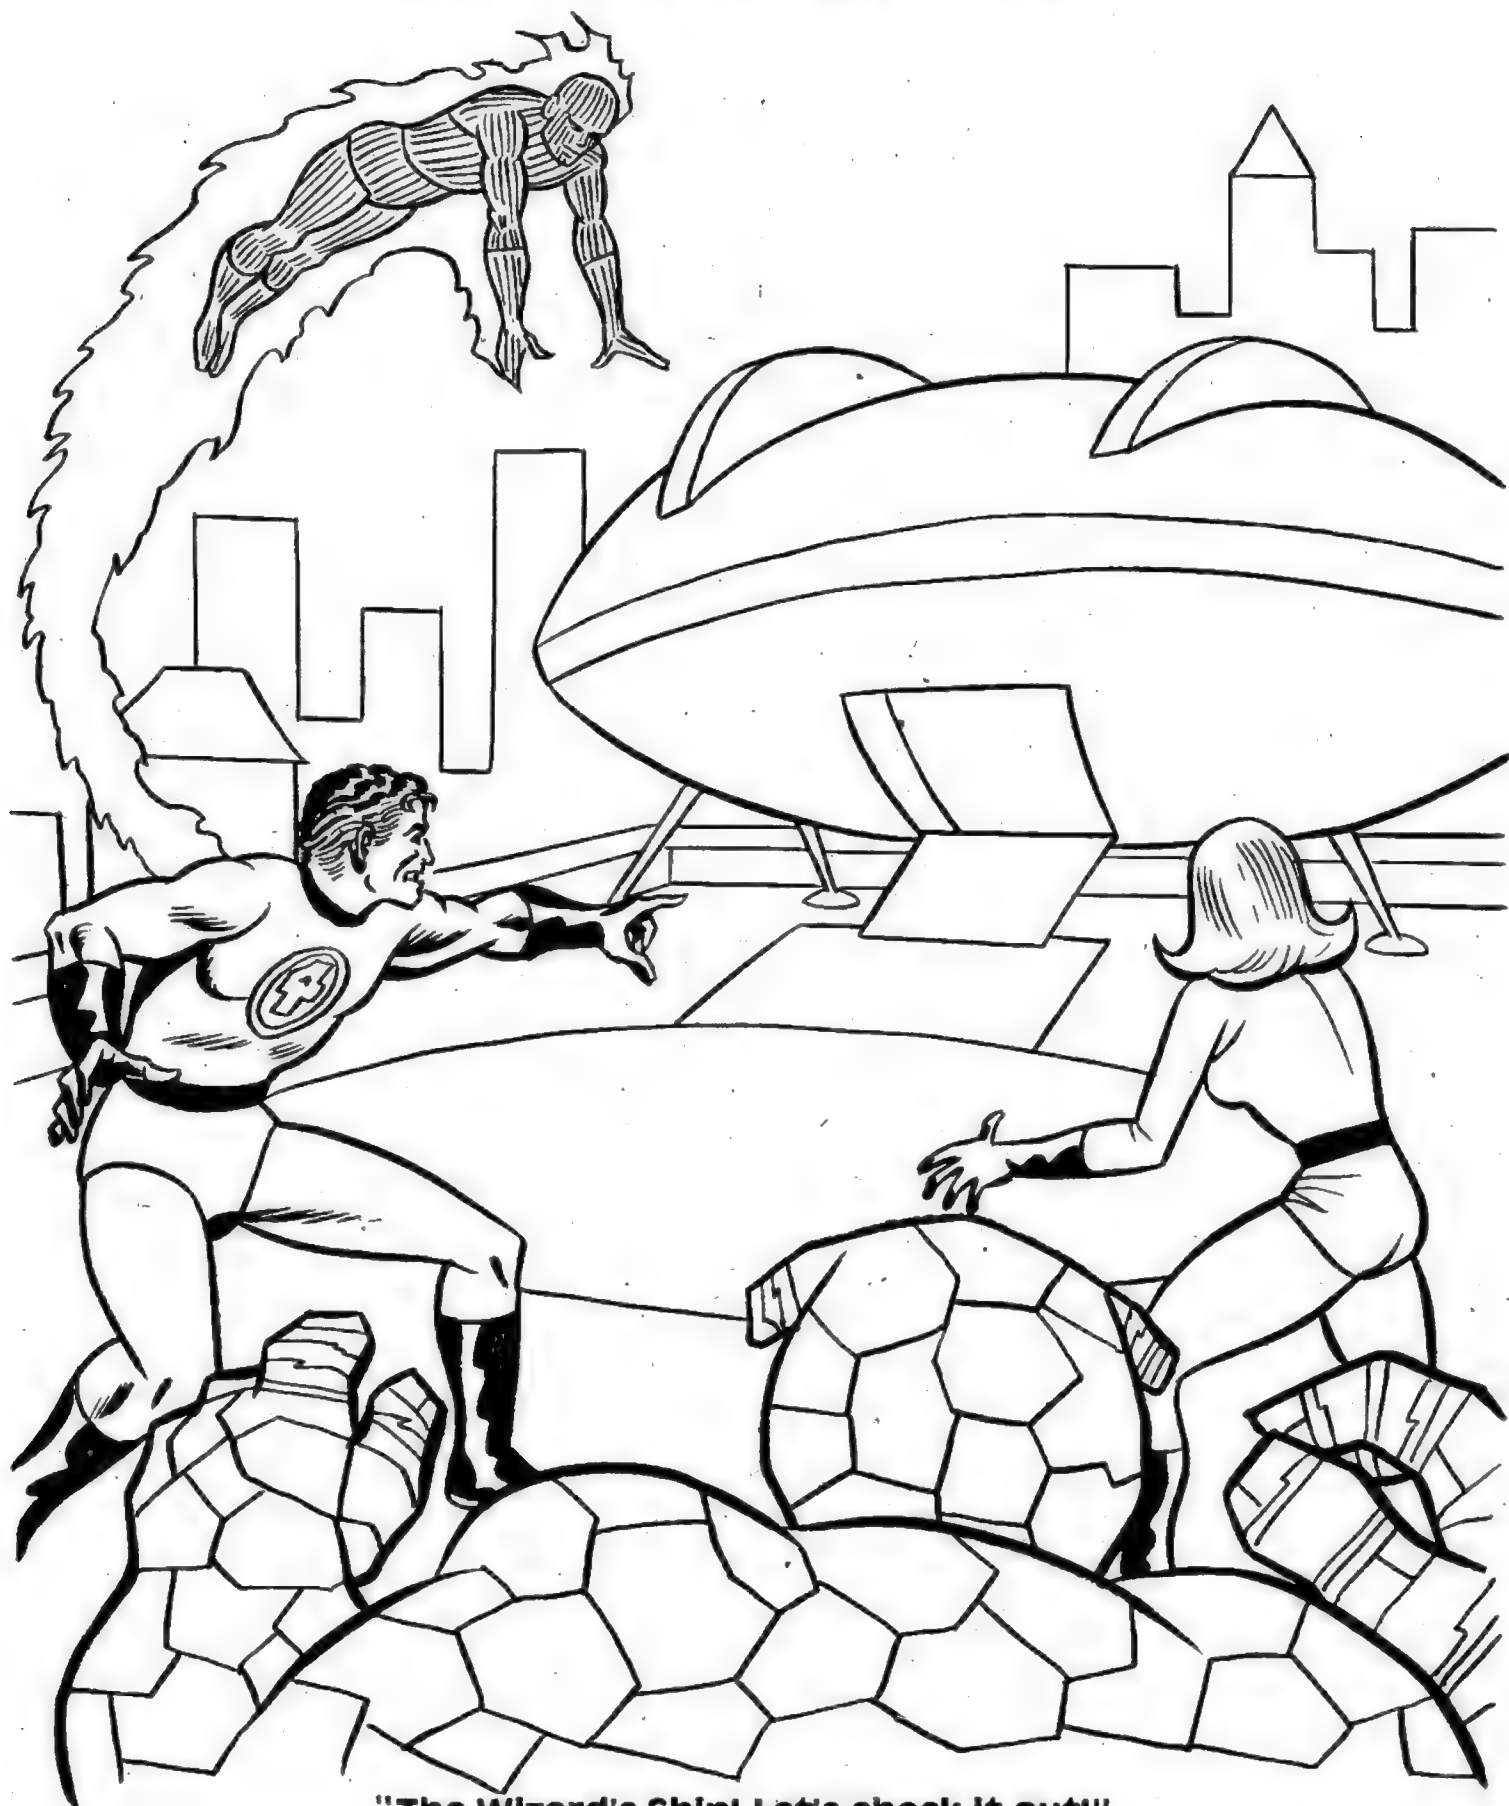

It works!

Mr. Fantastic stretches to become a *human parachute!*

Back on top of the Baxter Building...

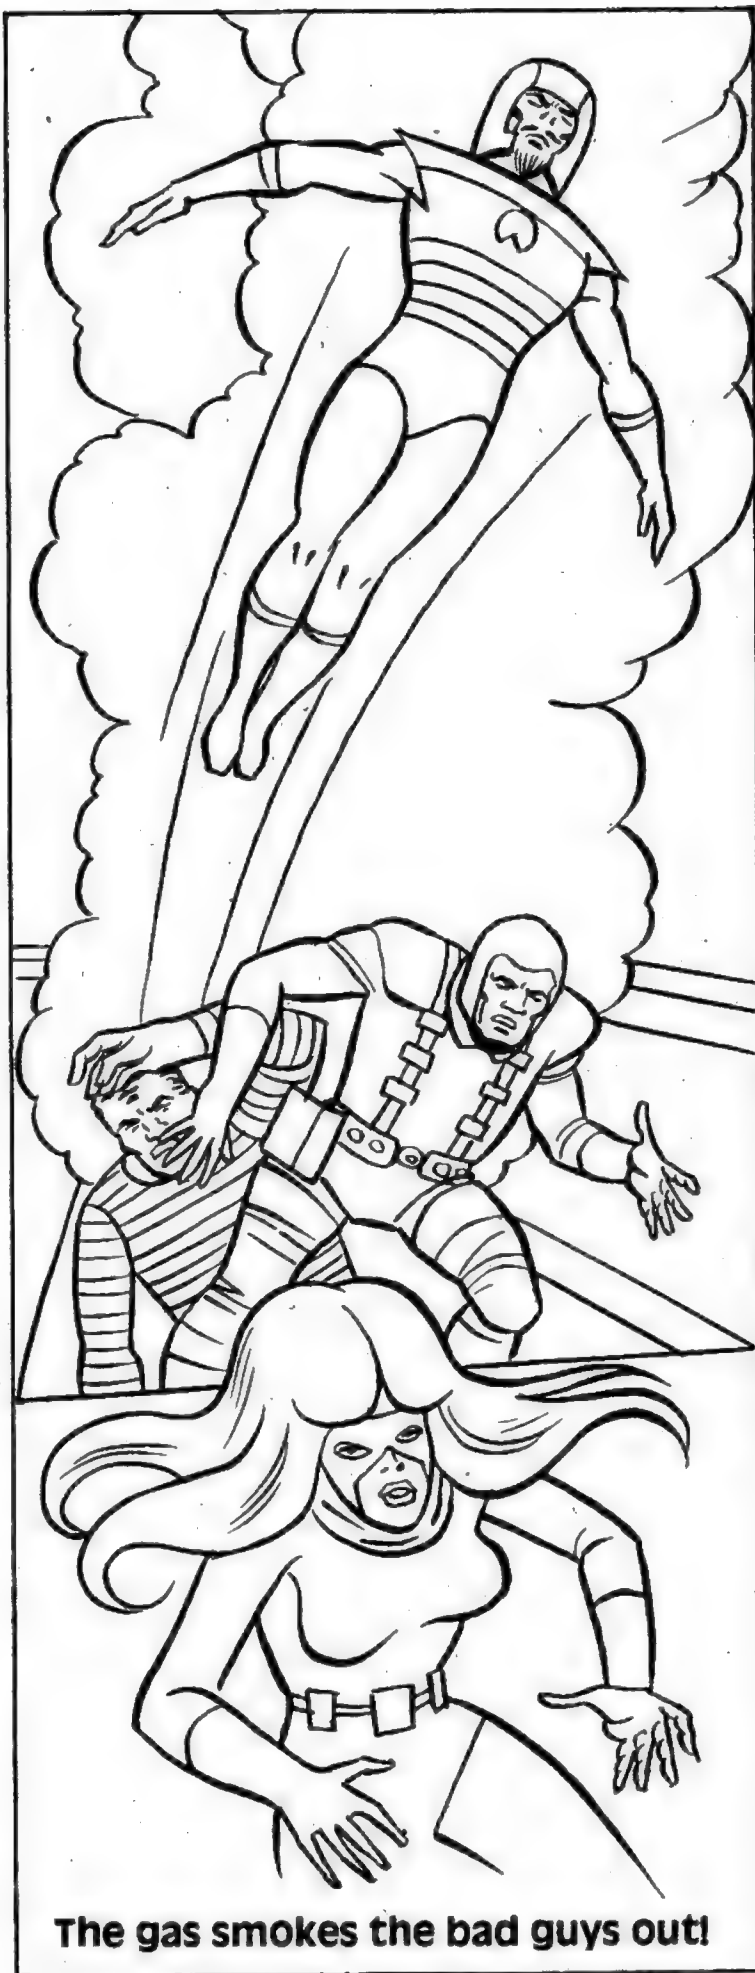

"The Wizard's Ship! Let's check it out!"

"Since the Frightful Four have *our* weapons -- we'll use *theirs!*"

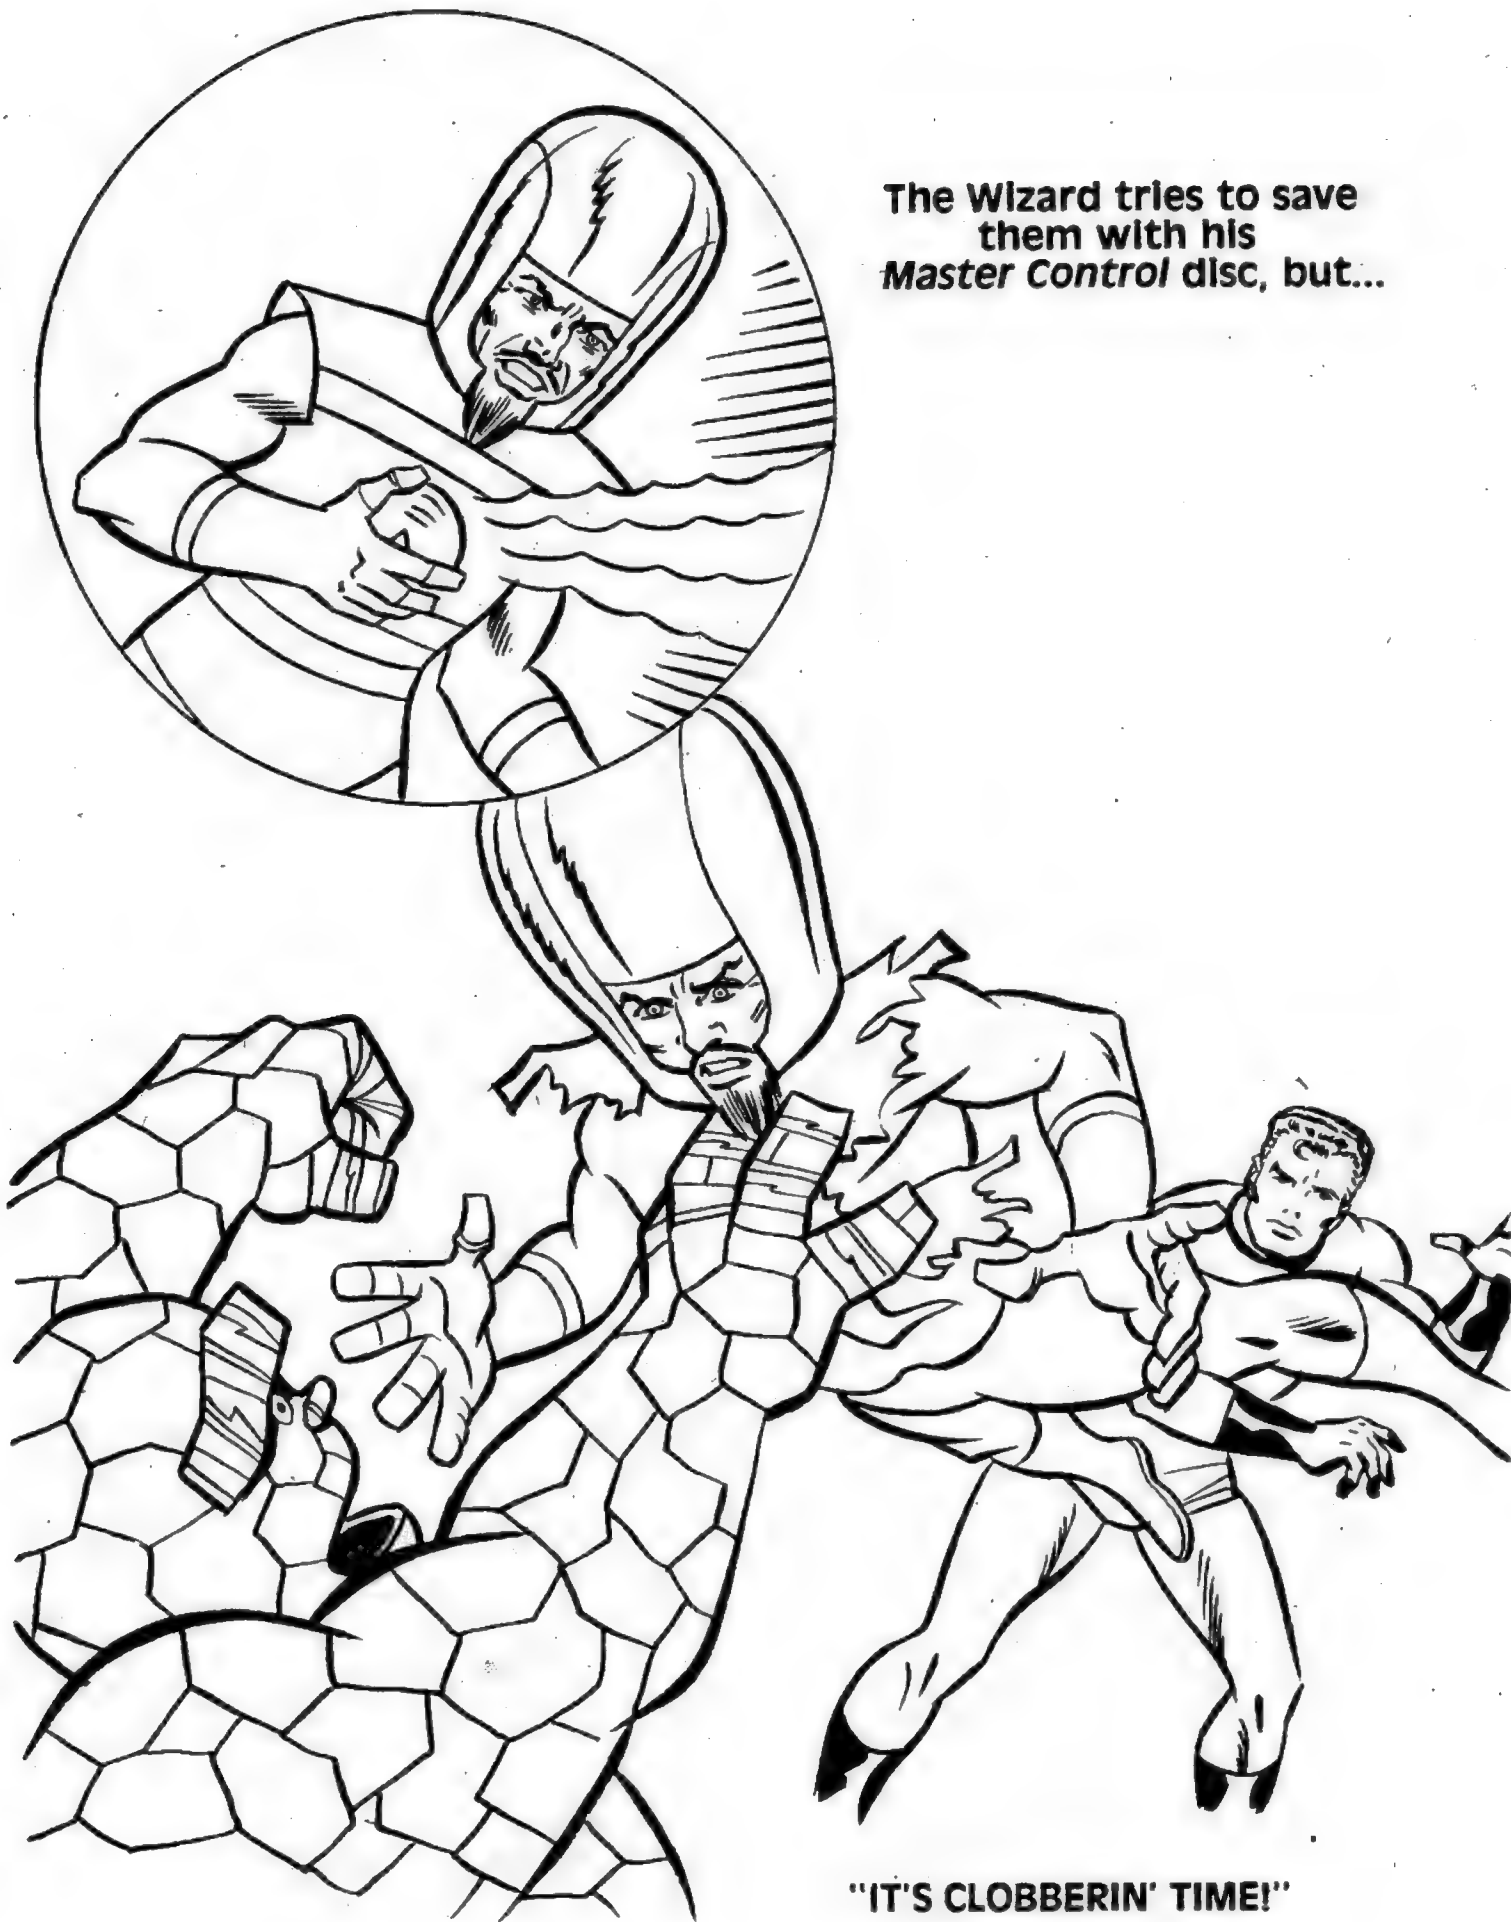

"They're right in here!"

The gas smokes the bad guys out!

The Wizard tries to save
them with his
Master Control disc, but...

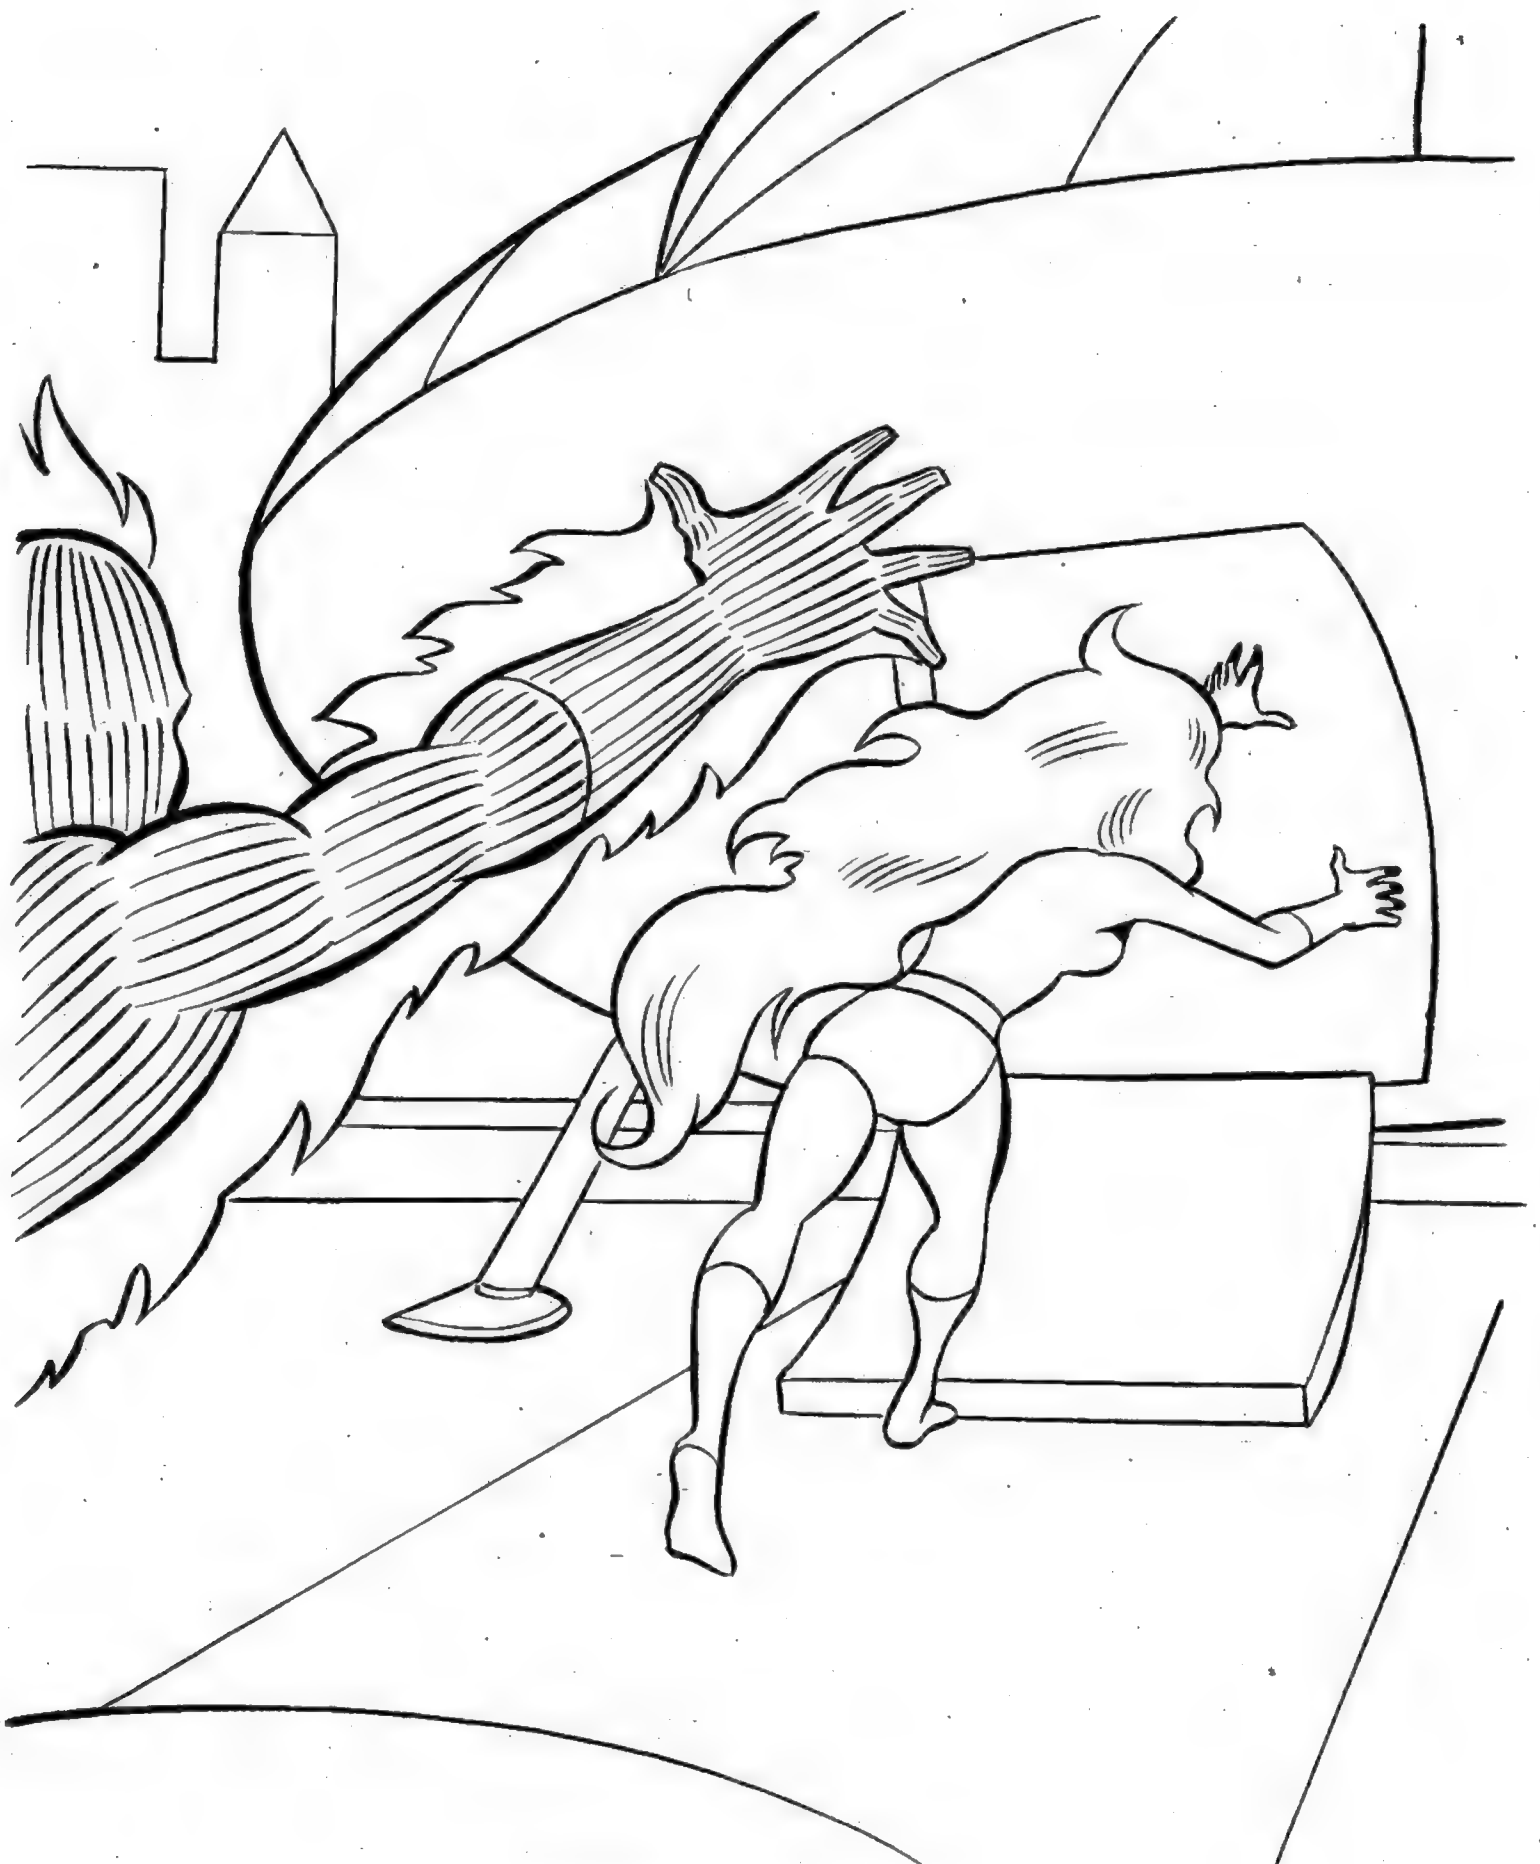

"IT'S CLOBBERIN' TIME!"

"I'll take that glue gun, Trapster! Where you're going, you won't need it!"

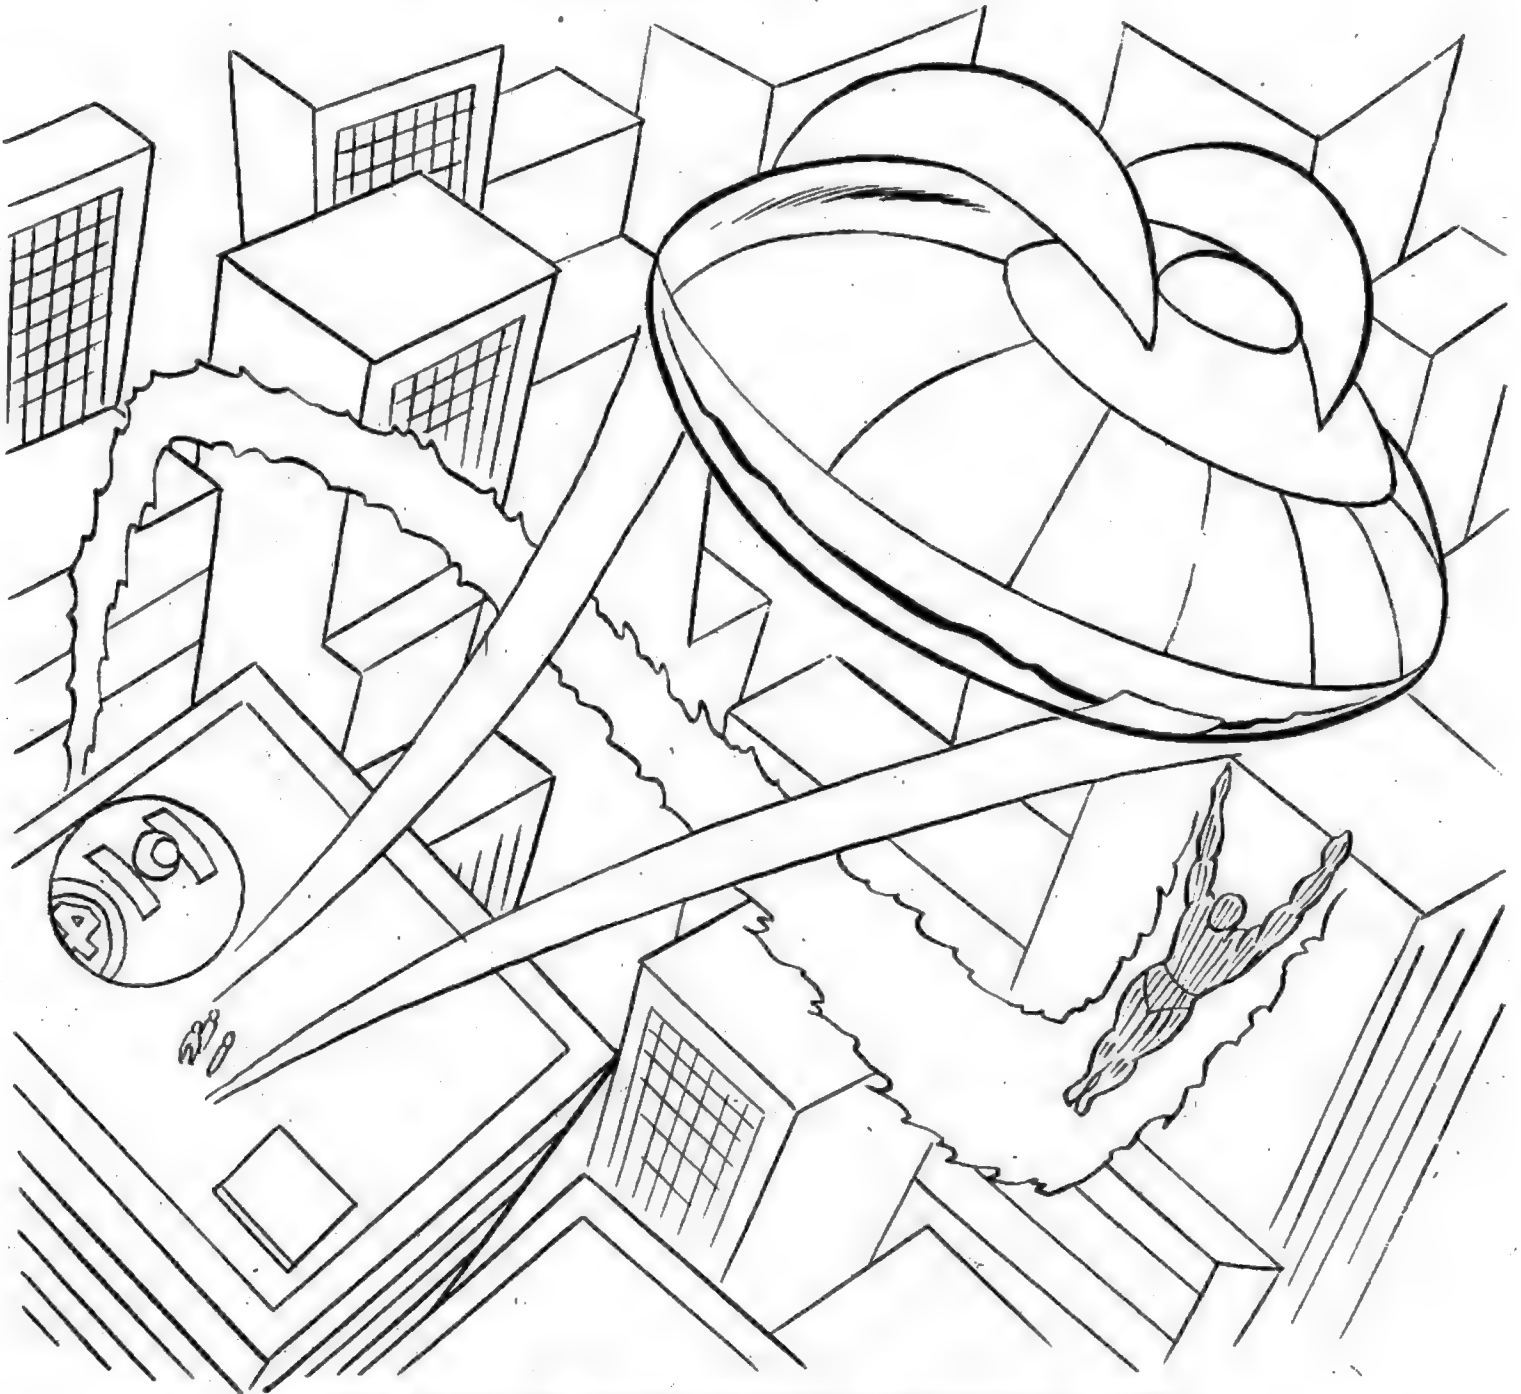

But what about Medusa?

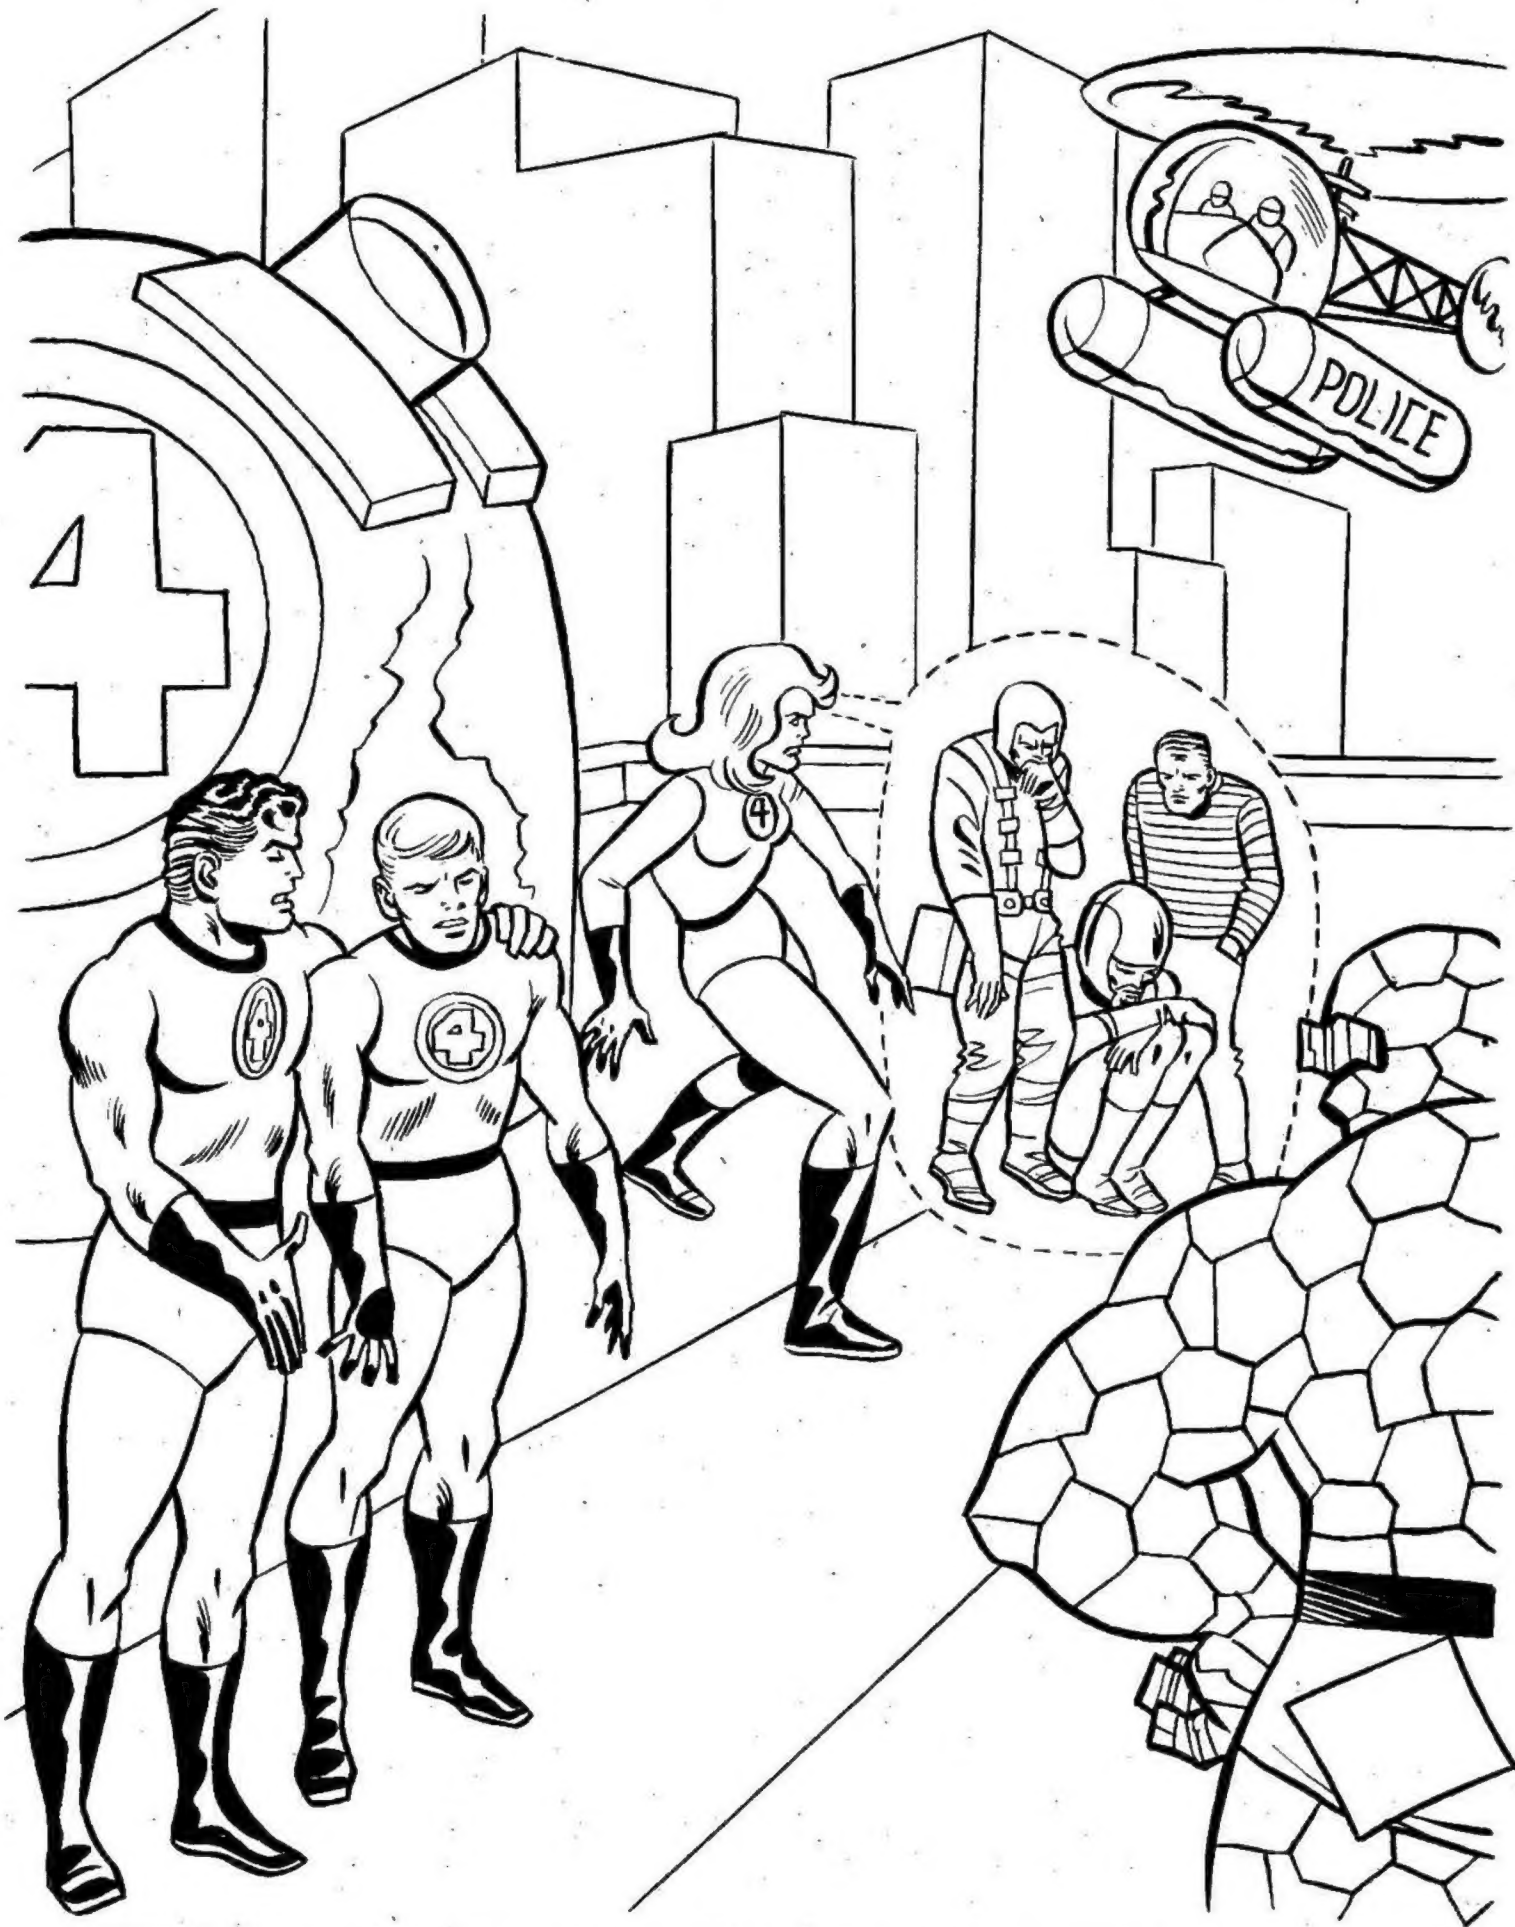

"She's getting away!"

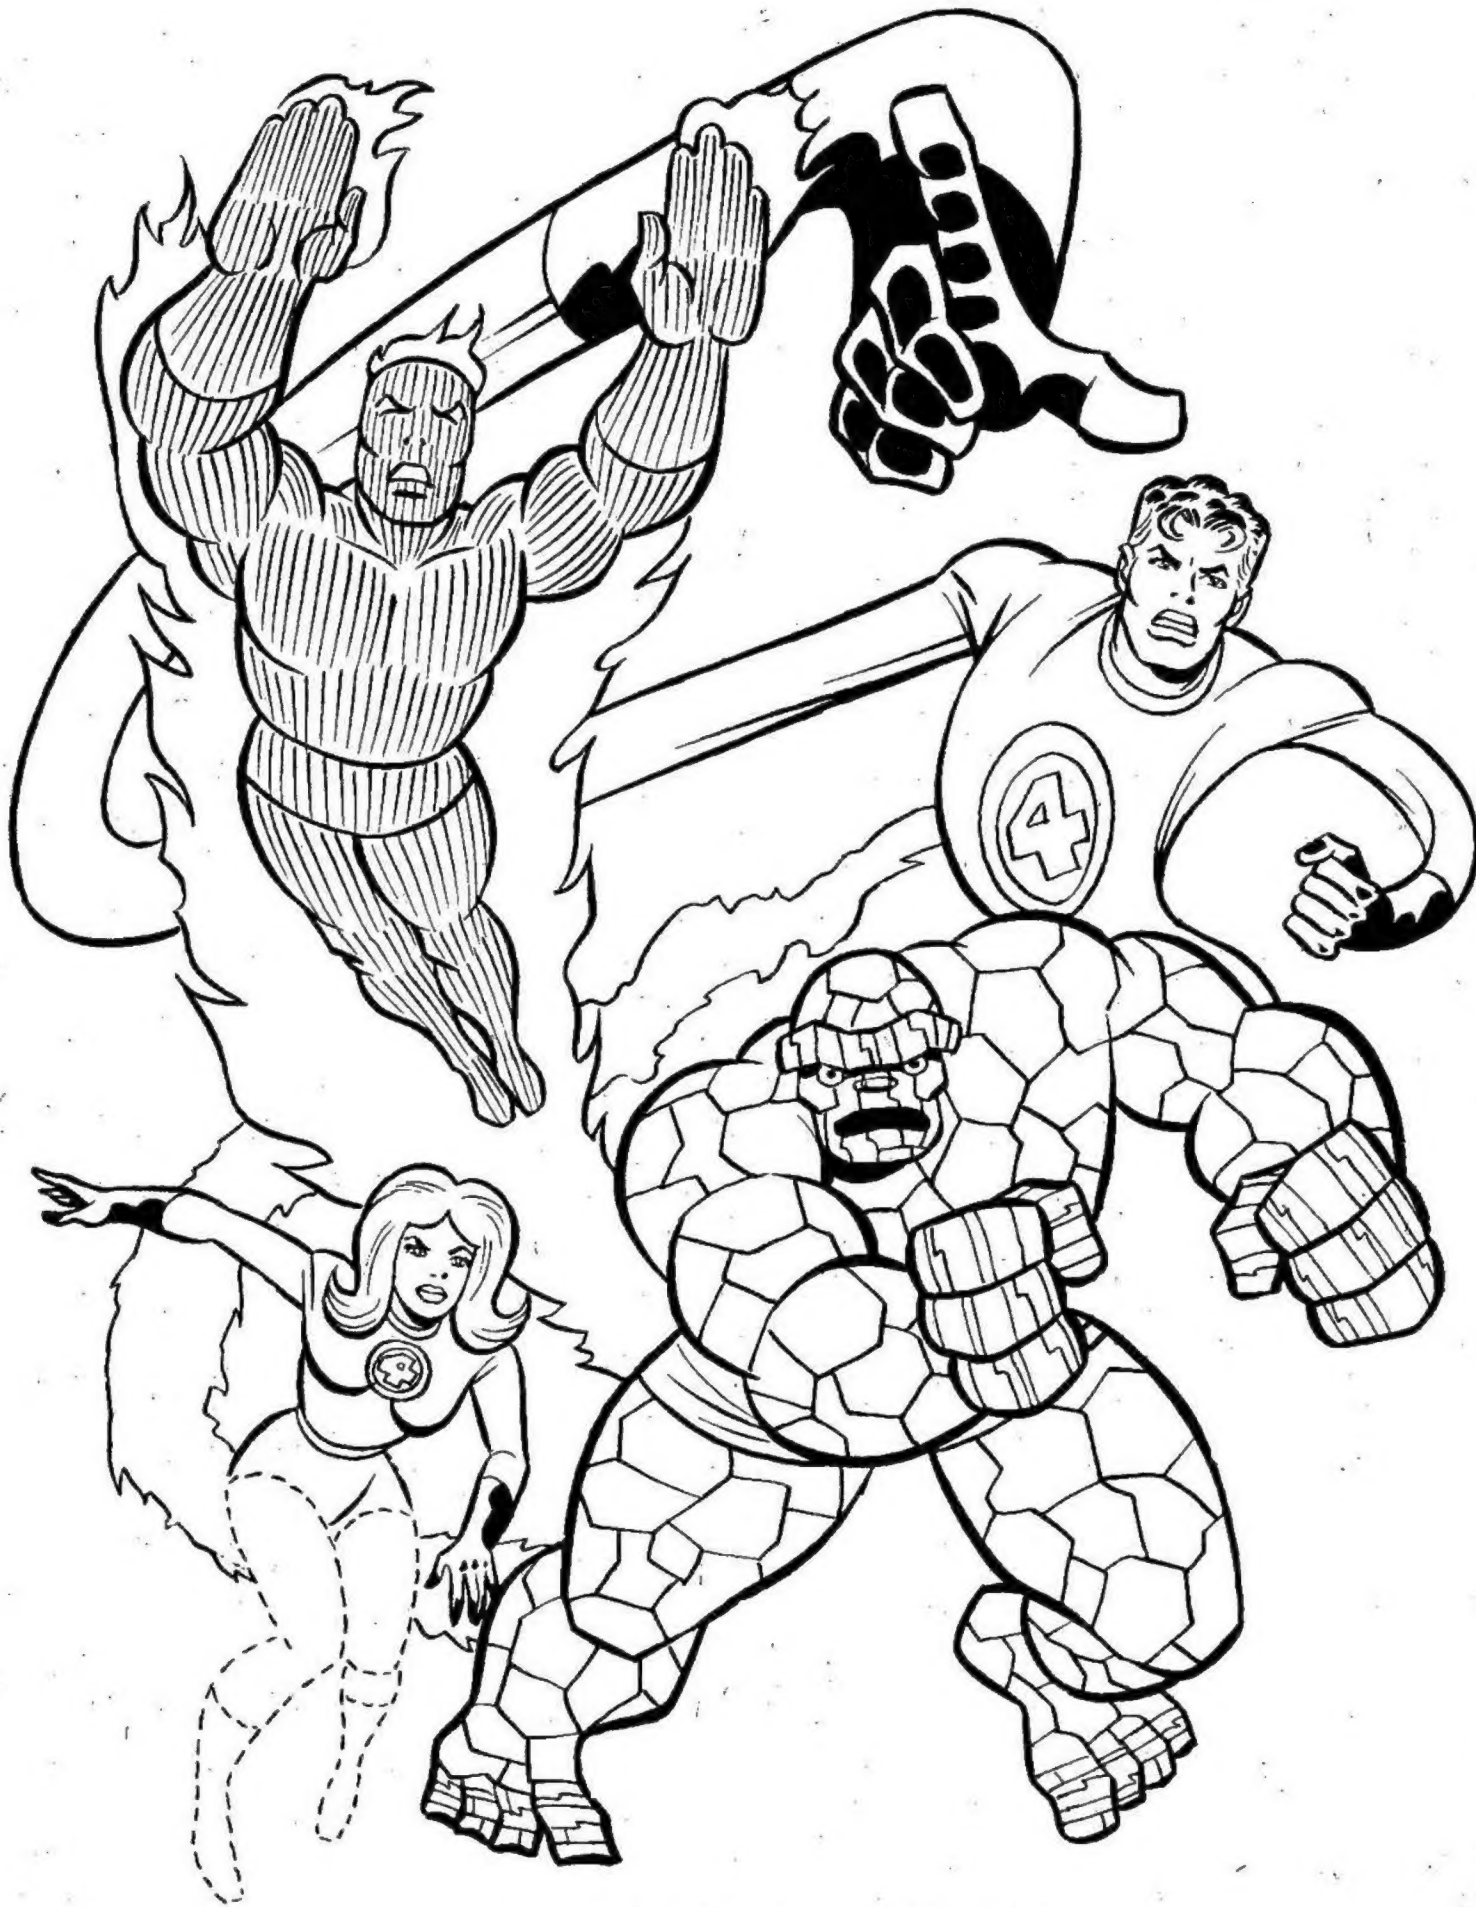

"But--I don't want to burn her!"

"Too late! That ship can fly *faster* than I can!"

"We'll deal with Medusa another time, Torch! As soon as the police pick up these three, let's go out for a pizza!"

They are -- The Fantastic Four!
